2) Letter ET 95-0067, dated July 13, 1995, from R. C. Hagan, WCNOG, to the NRC
Subject: Docket No. 50-482: Correction to Request for Revision to Technical Specifications to Implement Cycle 9 Nuclear and Core Thermal-Hydraulic Design Methodologies

Gentlemen:

Reference 1 submitted an application for amendment to Facility Operating License No. NPF-42 for Wolf Creek Generating Station (WCGS). This license amendment request proposes to revise Technical Specification 3.2.2, "Heat Flux Hot Channel Factor," Technical Specification 3.2.3, "Nuclear Enthalpy Rise Hot Channel Factor," Technical Specification 6.9.1.9, "Core Operating Limits Report," and associated Bases sections. The requested revision is needed to incorporate changes associated with the planned implementation of advanced nuclear and core thermal-hydraulic design methodologies purchased from Westinghouse Electric Corporation for the Cycle 9 reload design.

Attachment I to Reference 1 contained confidential commercial information which Westinghouse considers to be proprietary information, and thus Reference 1 requested that all bracketed information in Attachment I be regarded as proprietary information and withheld from public disclosure, in accordance with the provisions of 10 CFR 2.790. Reference 2 provided corrected copies of 2 pages of Attachment I of Reference 1.

The purpose of this letter is to provide a non-proprietary version of the safety evaluation and analysis provided in Attachment 1 to our original submittal (Reference 1). The attachment to this letter contains no proprietary information, and is suitable for public disclosure.
