LARRY D. ROOT
ASSISTANT VICE PRESIDENT
OF NUCLEAR REGULATION

Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

In accordance with the requirements of 10CFR50.59 and 50.90, we transmitted our proposed Technical Specification change regarding single recirculation loop operation on October 17, 1980. We hereby amend that application with the enclosed Technical Specification page changes.

This amended application limits single loop licensed power operation to 50% maximum. The October 17, 1980 submittal is bounding for 50% power operation.

Prior to returning to two loop operation from a power condition, we will consult with our recirculation pump manufacturer to determine an acceptable procedure.

It is our understanding that since this is an amendment to a previous application relating to the same change, no additional fee is required.

Three signed and 37 additional copies of this application are transmitted herewith. This application consisting of the foregoing letter and enclosures hereto is true and accurate to the best of my knowledge and belief.
