Callaway Design Inspection

attached is our response to the appeal board's question about Callaway observation 4-1x concerning the delay in resolving the issue of revised floor response spectra.

A note that we promised to review the results when Bechtel completes ~~the~~ the work. The most efficient way to do this will be for John Ma and/or Bob Shewmaker to perform a one- to two day follow up inspection ~~at~~ in Gaithersburg in January 1984. I will arrange such an inspection ~~at that time~~ ^{Dennis Allison} at that time.
