SUBJECT: Auxiliary Boiler Water Discharge, December 19, 1989

Dear Sirs/Madames:

Attached you will find a copy of the letter to the State of Maryland describing a non-compliance auxiliary boiler water discharge event at Calvert Cliffs Nuclear Power Plant which occurred on December 18, 1989. We are required by our NPDES permit for Calvert Cliffs to report to the State any non-compliance event.

If you have any questions regarding the attached, please call me at (301) 260-4905.

Sincerely,

B. Frank Sears

Supervisor, Water Treatment

CALVERT CLIFFS NUCLEAR POWER PLANT DEPARTMENT CALVERT CLIFFS NUCLEAR POWER PLANT LUSBY, MARYAND 20857

January 10, 1990

Mr. John Beazley Maryland Department of Environment 2500 Broening Highway Baltimore, Maryland 21224

Dear Mr. Beazley:

This letter is to inform you of a non-compliance condition that occurred at Calvert Cliffs Nuclear Power Plant.

On December 18, 1989, the auxiliary boiler blown down to the Chesapeake Bay via outfall 001, monitoring point 103. Over an approximately 1 hour period, 6000 gallons of auxiliary boiler water was discharged. The total suspended solids of this batch discharge was 43.0 mg/liter which was less than our daily maximum limit of 100 mg/liter. However, since this was the only discharge for the month, our monthly average of 30 mg/liter was exceeded.

No impact upon the receiving water was observed or is expected.

If you have questions regarding this information, please feel free to call me, 301/260-4905.

Sincerely,

B. Frank Sears
