UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

June 4, 1984

Docket No. 50-416

Mr. L. F. Dale, Director  
Nuclear Licensing and Safety  
Mississippi Power & Light Company  
P.O. Box 1640  
Jackson, Mississippi 39205

Dear Mr. Dale:

Subject: Grand Gulf Nuclear Station Technical Specifications  
Review Program

During the meeting on March 9, 1984, to discuss the Technical Specification Review Program (TSRP), a concern was expressed about the involvement of the same personnel in this review who might have previously been involved with the original Technical Specifications and approval of plant startup based on compliance with erroneous Technical Specifications. This concern is also expressed in a memorandum by Commission Gilinsky dated April 3, 1984, (Enclosure 1).

To clarify this situation, please provide additional information regarding review assignments and responsibilities for GGNS SROs who approved plant startup and also participated in the TSRP and a description of steps taken during the TSRP to ensure that the review was conducted in a competent manner.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

Sincerely,

Thomas M. Novak, Assistant Director  
for Licensing  
Division of Licensing
