Gentlemen:

SUBJECT: SPECIAL FIRE PROTECTION INSPECTION (REPORT NO. 50-458/92-04)

This is to advise you of a special fire protection inspection that has been scheduled for your River Bend Station during the week of January 27-31, 1992. The inspection will involve a team of four inspectors and will focus on the fire protection program including the application of thermal-lag fire barrier material at the River Bend Station. This letter confirms the telephone conversation between Mr. Elmo Collins of this office and Mr. Leif Dietrich of your staff on January 8, 1992.

The lead inspector and principal contact for this inspection is Mr. Amarjit Singh who can be reached by telephone at 301-504-2856. The inspectors will include Mr. Singh, Mr. Michael Murphy (Region IV), Mr. Malcolm Widmann (NRC Headquarters), and Mr. Tom Storey (NRC Consultant). Mr. Jim Gagliardo, Chief of the Test Programs Section of this office will accompany the inspectors for part of the inspection.

The inspectors are scheduled to arrive at the site on January 27, 1992 at approximately 1:00 p.m. and would like to schedule an entrance meeting at approximately 2:00 p.m. The inspectors and Mr. Gagliardo will need to receive initial, or refresher training to be badged for unescorted access. We request that you provide the required site-specific training to those individuals who need to be badged. Additional information to support badging members for unescorted access will be provided to you in separate correspondence.

An exit meeting will be scheduled for the early afternoon of the final day of the inspection. The lead inspector will conduct a daily debriefing with your staff regarding preliminary findings and concerns that may require prompt attention.
