Re: Catawba Nuclear Station
Significant Deficiency No. SD 413-414/84-06

Dear Mr. O'Reilly:

This is to inform you that all work has been completed on the essential (safety-related) Motor Control Centers (MCCs) for Unit 1 as referenced in the subject report. Of the nineteen MCC's, inspection is complete for all but four, these having been delayed by testing. These four remaining MCC's will be inspected by June 15, 1984.

Very truly yours,

Hal B. Tucker
