NOTICE OF VIOLATION

Commonwealth Edison Company

Docket No. 50-373

As a result of the inspection conducted on May 7-11, 1984, and in accordance with the General Policy and Procedures for NRC Enforcement Actions, (10 CFR Part 2, Appendix C), the following violation was identified:

10 CFR 50.54(q) requires in part that a licensee authorized to possess and/or operate a nuclear power reactor shall follow and maintain in effect emergency plans which meet the standards in 10 CFR 50.47(b) of this part and the requirements in Appendix E to this part. 10 CFR 50, Appendix E, Section IV.D.3 states in part that a licensee shall have the capability to notify responsible State and local governmental agencies within 15 minutes after declaring an emergency.

Contrary to the above, the licensee did not have the capability to notify offsite agencies within 15 minutes as demonstrated during the period from April 9, 1983 through April 29, 1984, when on all seven occasions the licensee did not initially notify the responsible State agency of an emergency at the LaSalle County Station within 15 minutes from the time of emergency declaration.

This is a Severity Level IV violation (Supplement VIII).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for the item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
