Licensing Branch No. 4

Re: Catawba Nuclear Station
Docket Nos. 50-413 and 50-414

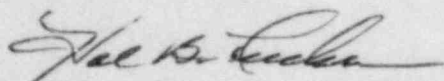

Dear Mr. Denton:

In a recent inspection of the Emergency Plans for Catawba, it was noted that certain procedures were not appropriately referenced in the Crisis Management Plan. The six specific procedures are:

- RP/O/B/5000/11 - Offsite Dose Projections without OAC
- HP/O/B/1009/06 - Alternative Method for Determining Dose Rate within the Reactor Building
- HP/O/B/1009/12 - Quantifying Gaseous Releases through Steam Relief Valves under Post-Accident Conditions
- HP/O/B/1009/13 - Offsite Dose Projection - Uncontrolled Release of Gaseous Radioactive Material through the Unit Vent
- HP/O/B/1009/14 - Offsite Dose Projection - Uncontrolled Release of Liquid Radioactive Material
- HP/O/B/1009/15 - Offsite Dose Projection - Uncontrolled Release of Gaseous Radioactive Material Other than through the Unit Vent

Please be advised that these procedures have been written and are contained in the Catawba Nuclear Station - Emergency Plan Implementing Procedures. The appropriate references to these procedures in the Crisis Management Plan will be included in the next revision to that document.

Very truly yours,

Hal B. Tucker
