### STONE & WEBSTER MICHIGAN, INC.

P.O. Box 2325, Boston, Massachusetts 02107

Mr. J. G. Keppler, Administrator, Region III Nuclear Regulatory Commission 799 Roosevelt Road Glen Ellyn, IL 60137 October 12, 1983 J.O. No. 14509 NRC File #83-10-12

RE: DOCKET NO. 50-329/330
MIDLAND PLANT - UNITS 1 AND 2
OVERVIEW OF THE CONSTRUCTION COMPLETION PROGRAM

The purpose of this letter is to indicate the status of CIO approval of QVP, BHO and Status Assessment.

QVP was conditionally approved by CIO letter, NRC File #83-06-17 dated June 17, 1983. The conditions were satisfied as reported in weekly reports No's 5 and 6. Status Assessment was conditionally approved by CIO letter, NRC File #83-06-30 dated June 30, 1983 and the conditions were satisfied as reported in weekly report No. 12.

BHO and CIO reported 5 observations resulting from the Management Review Committee meeting on May 18, 1983. These observations were satisfactorily responded to in CPCo letter, Serial CSM-0656 dated July 1, 1983. CIO weekly report No. 4 dated July 12, 1983 closes this item.

CIO considers QVP, BHO and Status Assessment ready for implementation.

CIO requires NIRs #002.003, 004 and 005 to be dispositioned prior to assignment of the referenced 45 MPQAD personnel to QVP. A "Hold Point," has been established against the use of the 45 personnel to perform QVP.

CIO report No. 16 identifies the review of "Vendor Equipment Program" as a Hold Point to Phase II of CCP.

Very truly yours,

S. W. Baranow Program Manager

### STONE & WEBSTER MICHIGAN,, INC. MIDLAND NONCONFORMANCE IDENTIFICATION REPORT

TO: Mr. J. Meisenheimer MPQAD

Page 3 of 3

FROM: MR. B. Holsinger S & W

SUBJECT: NIR # 15

October 4, 1983

Mr. Meisenheimer.

Stone and Webster request the following additional information;

- 1. The official organization chart.
- The job description that correspond to this organization chart above the inspector level.

This additional information will help in our evaluation of the responses.

B.L. Holsinger

### STONE & WEBSTER MICHIGAN, INC. MIDLAND NONCONFORMANCE IDENTIFICATION REPORT

NIR. 15

Page 2 of 3

Stone and Webster is not satisfied with the response to NIR No. 15, dated 9-22-83.

This NIR was written based upon the requirements stipulated in CPCo Procedure B-3M-1, not an interpretation of this procedure. Stone and Webster believes that a level of supervisory certification should be the practice as delineated in this procedure.

INITIATOR: Larry L. Holings 9-27-83

RE: DOCKET NO. 50-329/330
MIDLAND PLANT - UNITS 1 AND 2
OVERVIEW OF THE CONSTRUCTION COMPLETION PROGRAM

An evaluation of MPQAD training was performed by CIO utilizing Attribute Checklist  $N^{\circ}$  MP-MIS-018E-0005 and MPQAD Procedure  $N^{\circ}$  B-3M-1.

Records of personnel trained to PQCI N° E-6.0, Rev. 16 were selected for evaluation with records of 6 persons being randomly selected from a population of 45 persons listed on computer printout dated September 19, 1983. (The listing of the 45 persons is attached). All six reviewed records contained one or more discrepancies thus rendering the lct of 45 unacceptable. (See NIRs #002 thru #005 attached)

CIO is transmitting the NIRs to MPQAD along with a request that they review the records of all personnel listed on printout dated September 19, 1983. The NIRs will be statused on the weekly reports to you.

Very truly yours,

W Devange

 Letter to Mr J W Cook dated September 15, 1983 for Mr J G Keppler regarding Protocol Governing Communications for Stone and Webster Independent Third Party Overviews on Midland Plant, Units 1 and 2

This letter confirms that Consumers Power Company accepts and will adopt the protocol provided in the reference for communications between Consumers Power Company and Stone and Webster in its capacity as Construction Implementation Overviewer and the Third Party Overviewer on the Remedial Soils Program.

Stone and Webster has reviewed and concurs with the protocol. Confirming prior verbal direction, they are instructed by copy of this letter to adopt the protocol in their third party work on the Midland Project.

Consumers Power Company ATTN: Mr. James W. Cook Vice President Midland Project 1945 West Parnall Road Jackson, MI 49201

#### Gentlemen:

We have reviewed your proposal to have the Stone and Webster Corporation (S&W) perform the third party independent overview of the Construction Completion Program (CCP). Our evaluation is enclosed.

The staff has considered the qualifications of both the S&W organization and the individuals proposed as team members to conduct the Construction Implementation Overview (CIO) of Consumers Power Company's (CPCo) Construction Completion Program. Inputs to this review included the information supplied by S&W, as set forth in the April 6, 1983, April 11, 1983, and May 19, 1983 submittals, the staff's existing knowledge of S&W performance at other nuclear power plants, and information as to S&W personnel competence.

The CIO program described by S&W in the August 30, 1983, and September 9, 1983, submittals and at the August 25, 1983, meeting has been reviewed by the NRC staff and found to constitute an acceptable third party overview program. The NRC staff has reviewed the CIO activities performed to date and has found this overview to have been adequate.

Based on NRC review of the documentation submitted by CPCo and S&W, followup checks, and consideration of comments by members of the public, we conclude that S&W meets the independence and competence criteria for third party reviewers and that S&W's proposed CIO program is adequate to provide for an assessment of the Construction Completion Program (CCP).

This letter constitutes NRC approval of S&W to perform the CIO.

Should you have any questions regarding this letter please contact Mr. R. F. Warnick of my staff.

Sincerely,

Original stoard by

James G. Keppler Regional Administrator

STAFF EVALUATION OF CONSUMERS POWER COMPANY
PROPOSAL TO USE STONE AND WEBSTER MICHIGAN, INC.
TO CONDUCT THE THIRD PARTY
CONSTRUCTION IMPLEMENTATION OVERVIEW OF THE
MIDLAND NUCLEAR PLANT

### Purpose and Background

The purpose of this document is to provide an evaluation of the Consumers Power Company's (CPCo) proposal to use Stone and Webster (S&W), Michigan, Inc. to conduct the third party overview of the Construction Completion Program at Midland. Consumers' proposal is documented in their letter of April 6, 1983, in response to the NRC's March 28, 1983, request for additional information. The CPCo commitment to provide for an independent third party Construction Implementation Overview (CIO) has been reviewed and found acceptable. This evaluation provides the basis of the NRC's acceptance of Consumers proposal.

The purpose of the CIO is to provide an independent overview of the Construction Completion Program (CCP) to assure the program is adequate and will be properly implemented. This is to ensure that the construction of the facility can be completed in conformance with the Commission's regulations and the construction permits.

The S&W overview of the CCP will be independent from and supplemental to the normal NRC inspection program. As part of their inspection program, the NRC inspectors will monitor and review the S&W CIO.

The use of S&W as the third party overviewer will provide additional assurance of proper implementation of the quality program. In addition, it will function as a mechanism to allow members of the public and the NRC to regain confidence in the program.

The results of the overview program will be submitted to the Regional Administrator in a weekly report of CCP activities overviewed and any problems identified.

The NRC has required communications between CPCo and S&W to follow a protocol to assure S&W's independence is being maintained and to assure public and NRC knowledge of S&W activities and correspondence. It should be noted that the protocol provides for a monthly meeting, open to the public for observation, to review S&W activities for the month and to discuss problems identified by the overview.

### CPCo's Proposed Third Party Reviewer

CPCo has proposed that Stone and Webster perform an independent overview of the Midland project CCP. The NRC staff has considered CPCo's submittal of April 6, 1983, and responses to Region III questions, public comments, and the clarification of submitted comments and additional comments received at

public meetings held in Midland, Michigan on February 8, 1983, and August 11, 1983. In addition, the staff conducted numerous meetings and telephone conversations with representatives of the Government Accountability Project (GAP) and the intervenors. In considering CPCo's proposal, the staff has used as guidance the letter of February 1, 1982, from Chairman Palladino to Congressmen Ottinger and Dingell, (attached) which sets forth the "competence and independence" standards that have been applied by the Commission in determining the acceptability of proposed third-party reviewers.

### S&W Competence

The staff has considered the qualifications of both the S&W organization and the individuals proposed as team members to conduct the independent overview of the Midland project. Input to the staff's review included the information supplied in CPCo's submittal, the responses to the staff's inquiries, the S&W submittals, and the staff's existing knowledge of S&W performance at other nuclear power plants.

The staff has reviewed S&W's experience in assessing nuclear construction projects, particularly its performance in independent reviews of design, construction, and quality assurance undertaken for utilities as input to the NRC's operating license reviews. 1

The staff has also reviewed the qualifications of the key persons proposed for the project, as set forth in the April 6, 1983, April 11, 1983, and May 19, 1983, submittals, and has concluded that the team has significant stated experience in QA/QC matters, nuclear plant construction, and management systems. These are the skills which we find necessary to carry out the third party overview. Through reference checks and/or discussions with NRC staff members familiar with the key personnel, we have verified their experience and competence in these areas.

Based upon its review, the staff concludes that the S&W organization and the individual overview team members are competent to conduct the Construction Implementation Overview and meet the technical competence standards set forth in the Ottinger/Dingell letter.

#### S&W Independence

The staff believes that for an organization to be acceptable to conduct this program the organization must be independent of the utility which owns Midland and independent of contractors whose work will be subject to the third party overview. Independence has been defined by the Commission as being the ability "... to provide an objective, dispassionate technical judgement, provided solely on the basis of technical merit...." (Page 1 of Response to Questions, attached to Ottinger/Dingell letter.) The Commission further defined the term by stating that the company approved to conduct an independent review must be one "...not previously involved with the activities...that they will now be reviewing..." Id.

<sup>1</sup>Reference Secy 82-414, "Diablo Canyon Design Verification Program Phase II Recommendations"

The staff has reviewed the information provided by CPCo and S&W regarding previous work performed by S&W for the Midland site and the principal contractors for the Midland project. Previous work at Midland consisted of limited activities (one person) in the planning phase of providing interface controls going from construction/preoperation testing into operations and is not considered to violate the independence criteria.

To the best of our knowledge, all the professional personnel assigned to work on the Midland Construction Implementation Overview have provided the NRC with sworn statements regarding their independence. S&W has stated that none of the staff expected to be assigned to the Midland review has any prior work experience with CPCo or on Midland.

Based on this information and the assessment of S&W to perform work as defined in Secy 82-414, the staff has no basis to believe that S&W is not sufficiently independent of CPCo.

The staff concludes that S&W and the key personnel who have been identified for the conduct of the review meet the standards of independence outlined in the Ottinger/Dingell letter.

### S&W's Overview Program

The purpose of the independent third party overview is to provide additional assurance that the CCP is adequate and will be properly implemented. This overview requirement was necessitated by the loss of NRC staff confidence in CPCo to implement successfully the Quality Assurance Program. The CIO will remain in place at the Midlan, site until the necessary confidence level has been restored to the satisfaction of the NRC staff. CPCo also has the option to continue the CIO as an additional system of checks and balances, beyond any period of time required by the staff.

The written CIO program is controlled by site originated program documents and by S&W corporate program documents as follows:

- A. The documents written expressly for the CIO include:
  - . CIO Program Document dated April 1, 1983
  - . CIO Quality Assurance Plan
  - . Third Party CIO Plan
  - . CIO Assessment Procedure, 10.01
  - . Nonconformance Identification and Reporting Procedure, 15.01
  - A detailed attribute checklist for each CPCo Project Quality Control Instruction (PQCI)

- A detailed checklist to review generic types of requirements (for non-PQCI activities); e.g., QA Audits and Surveillances
- Additional Quality Control Instructions as needed to provide adequate overview control
- B. The following S&W corporate master program documents will also be utilized for the CIO, as required:
  - QA Topical Report SWSQAP 1-74A, S&W Standard Nuclear Quality Assurance Program
  - . S&W Quality Standards; e.g., for quality sampling
  - . S&W Quality Assurance Directives

The NRC met with S&W on August 25, 1983, to gain additional insight into the total S&W program. This meeting was held in Midland, Michigan and was open to the public. Questioning by the public on the CIO was permitted at the end of the meeting. Subsequent to this meeting, S&W submitted on August 30, 1983, to the NRC copies of the material presented at the August 25, 1983, public meeting and on September 9, 1983, submitted a summary of the program presented at that same meeting.

The program described by S&W in the above documents and at the August 25, 1983, meeting has been reviewed by the MRC staff and found to constitute an acceptable third party overview program. The CIO program will be audited independently by the S&W corporate QA staff from Boston and on a routine inspection effort by the NRC.

S&W personnel onsite for the CIO will vary with the demand of the work activities to be overviewed. S&W's CIO staffing plan currently has nine people assigned at the Midland site and there are currently planned increases to 32 people as work activities dictate. These numbers, however, are only estimates and S&W will commit whatever personnel is necessary to conduct the CIO. The number of personnel used is not subject to limitation by CPCO.

The S&W overview activities of the CCP to date have been somewhat limited, since the CCP has not yet been approved and work in progress is therefore limited. Activities being overviewed were pre-Phase I. The activities being overviewed have included the following CCP and non-CCP activities:

- Program and procedure review
- . Review of MPQAD QA/QC personnel training and certification
- Review of general training of CPCo and Bechtel personnel, including construction craftspersons
- . Review of CCP Management Reviews

- Review of System Interaction Walkdowns
- . Review of Design Documents

The above reviews have identified various concerns and one nonconformance that required CPCo actions to resolve. The NRC staff has reviewed the CIO activities performed to date and has found this overview, including actions taken by CPCo, to have been adequate.

### Summary and Conclusion

Based on NRC review of the documentation submitted by CPCo and S&W, followup checks, and consideration of comments by members of the public, we conclude that S&W meets the independence and competence criteria for third party reviewers and that S&W's proposed CIO program is adequate to provide for an assessment of the Construction Completion Program (CCP).

Docket No. 50-329 Docket No. 50-330

Mr. J. W. Cook Vice President Consumers Power Company 1945 West Parnall Road Jackson, MI 49201

Subject: Protocol Governing Communications for Stone and Webster Independent Third Party Overviews on Midland Plant, Units 1 and 2

As you are aware, we are in the process (nearing completion) of reviewing your proposed Construction Completion Program, (CCP) including its provision for Stone and Webster to serve as a third party overviewer. As a condition for accepting the CCP, and to provide the necessary confidence that the third party is of sufficient independence, we propose that you adopt the attached Protocol to govern communications with the third party.

A key aspect of the enclosed Protocol is a monthly meeting between Consumers Power Company, the independent third party overviewer and the NRC to discuss the previous month's third party overview activities and any problems encountered during the overview. The initial monthly meeting is scheduled for October 13, 1983.

Please confirm in writing that Consumers Power Company and Stone and Webster adopt the Protocol. This confirmation is a prerequisite to the NRC staff's approval of the CCP.

Should you have any questions regarding this letter, please contact Mr. R. F. Warnick of my staff.

Sincerely,

James G. Keppler Regional Administrator

### PROTOCOL GOVERNING COMMUNICATIONS BETWEEN CONSUMERS POWER COMPANY

### AND STONE AND WEBSTER (S&W) IN THE REMEDIAL SOILS AND

### CONSTRUCTION COMPLETION PROGRAMS

- 1. This protocol governs communications between Consumers Power Company (CPCo) and Stone and Webster (S&W) in its capacities as the Construction Implementation Overviewer in the Midland Construction Completion Program (CCP) and the third party overviewer of the underpinning activities and the Remedial Soils Program.
- All exchanges of correspondence, including drafts, between S&W and CPCo will be submitted to the Administrator of NRC Region III at the same time as they are submitted to CPCo.
- 3. S&W has a clear need for prompt access to information and activities required to fulfill its role. To this end, S&W may request documents, meet with and interview individuals, conduct telephone conversations, conduct audits and inspections, establish and witness program hold points, review work and inspection activities, and undertake similar activities without prior notification to the NRC staff.
- 4. As a normal program function, S&W may meet with CPCo daily, or as necessary, to discuss program activities such as licensee work schedule, licensee activities overviewed, action items identified, action taken on identified items, resolution and close-out of these actions, audits conducted, and hold points witnessed. A weekly report shall be issued to document these meetings. These meetings shall be open to NRC staff attendance.
- 5. CPCo and S&W shall meet with the NRC staff monthly to discuss the previous month's activities. Topics to be addressed will include the status of action items and any problems encountered. The meetings shall be open to public observation and shall normally take place on the second Thursday of each month at 9:00 a.m. and shall normally be held at Consumers Power Company Service Center located at 1100 S. Washington St., Midland, Michigan. Minutes of the monthly meetings shall be prepared by the third party and transmitted to the NRC and CPCo.

6. All documents submitted to, or transmitted by the NRC subject to this Protocol, will be placed in the NRC Public Document Rooms in Midland, Michigan and Washington, D.C., and will be available there for public examination and copying.

### SUMMARY OF PRESENTATION TO NRC ON AUGUST 25, 1983 CONSTRUCTION IMPLEMENTATION OVERVIEW (CIO) PROGRAM

### Background to CIO

The Construction Completion Program (CCP) has been developed by Consumers Power Company to control the construction and quality activities needed to complete the Midland Nuclear Power Station. One feature of the CCP is the use of an independent third party to assess the CCP's effectiveness in evaluating existing systems, structures, and components and efforts to complete unfinished work.

Consumers Power Company has proposed Stone & Webster as the third party. This selection was based on Stone & Webster's independence with respect to the work to be performed, and on Stone & Webster's experience and technical capabilities to do the job.

### Scope of CIO Program

The scope of the CIO Program is to independently assess CCP adequacy. CCP activities presently assigned to the CIO team for assessment are:

- Phase I Planning
- Management Reviews
- Installation and Inspection Status
- Quality Verification Program (QVP)
- Phase II

Activities outside of the CCP, but included in the CIO Program for assessment, are:

- HVAC/ZACK
- NSSS/B&W
- Spatial System Interaction Program (SSIP)

### CIO Organization

The CIO Team is made up of two functional groups - the Program Evaluation Group and the Physical Verification Group. The Program Evaluation Group is responsible for assessing compliance with programmatic provisions of the CCP, plans, procedures, commitments, personnel qualifications, training programs, organizational practices, and nonconformances. The Physical Verification Group is responsible for assessing compliance of CCP team, MPQAD, construction, and craft personnel with pertinent procedures and instructions.

The Program Manager is responsible for directing the day-to-day activities of these two groups. The Program Manager receives technical direction from the Stone & Webster Manager of Quality Assurance and resource support from the Project Manager.

A Senior Overview Committee is responsible for monitoring the performance of the CIO Program and providing direction when appropriate. Monitoring will be done by reviewing reports, correspondence, and nonconformances and observing site activities during periodic visits.

### Experience Level of CIO Team

Key members of the CIO Team have significant experience with the construction of nuclear power stations. The Program Manager has 15 years of nuclear experience with 10 of those years spent at 5 new construction sites. The Supervisor of Program Evaluation has 25 years of nuclear experience with 13 of those years spent at 8 new construction sites. The Superintendent of Physical Verification has 14 years of nuclear experience with 12 of those years spent at 4 new construction sites.

### Supporting Documents for CIO Program

The Stone & Webster Corporate Quality Assurance Program is described in the NRC approved topical report, SWSQAP 1-74A, "Stone & Webster Standard Nuclear Quality Assurance Program". This base document is supplemented by volumes of Quality Standards and Quality Assurance Directives. Provisions of these documents that are applicable to a project and special instructions that are needed to accomplish unique work items, are covered by project procedures and instructions. Corporate generic procedures and instructions are available for use or as models for project document development.

For the CIO effort, four project procedures have been approved by the Corporate Manager of Quality Assurance to supplement Corporate documents in carrying out the assessment of the CCP. These procedures are the Third Party Construction Implementation Overview Program, which establishes the CIO Program; the Project Quality Assurance Plan, which describes quality assurance provisions for the project; QCI 10.01, which describes the procedure for conducting the assessment; and QCI 15.01, which describes the procedure for processing Nonconformance Identification Reports. Additional project procedures will be issued as needed to cover unique items that arise during the CIO effort.

### CIO Methodology

The methodology to be used in assessing the installation and inspection status and Quality Verification Program (QVP) of the CCP consists of (1) surveying the activities of each CCP team and all inspections within the purview of each team to evaluate the process being used to carry out the CCP and then, (2) taking a statistical sample of MPQAD inspections and evaluating the results by conducting independent inspections with CIO team members to assess the final product. A full time monitor from the CIO team will be assigned to each CCP team until team performance and inspection results are deemed satisfactory. Full time monitoring might then be adjusted downward, but independent sampling of QVP inspections would continue to ensure that the overall CCP process is being effectively implemented. If independent inspections indicate that problems are developing, full time monitoring will be restored.

Sampling of QVP inspections will be conducted using MIL-STD-105D as the basic statistical method. MIL-STD-105D was selected because it is nationally recognized. Sample lots will be based on the number of inspection attributes completed during a period of time within a CCP team's area/module. Attributes selected for inspection will be assembled to cover the various commodities and inspectors involved and previously identified weaknesses; such as, QA records, control of purchase material, design change control, production welding, document change control, cable pulling, training, etc. Sample size will be based on a 95-5 confidence level. Inspection results, including non-conformances, will be collected, analyzed, and trended to determine the appropriateness of inspection levels and will be used to evaluate changes in those levels.

One of the objectives of the CIO Program is to assess the ability of MPQAD to identify deficiencies in the plant. Sampling the product from MPQAD inspections will provide a reliable assessment of that effectiveness.

Programmatic and training aspects of the CCP will be assessed by reviewing implementing documents and commitments and then developing checklists for use by CIO team members in verifying compliance by surveillance and document reviews.

Deficiencies identified by CIO team members, and not previously reported by MPQAD, will be documented on Nonconformance Identification Reports. These reports will be sent to Consumers Power Company and the NRC, tracked to ensure that satisfactory corrective action is taken, and summarized on weekly reports and during monthly public meetings.

The methodology to be used by Stone & Webster in carrying out the CIO Program will ensure:

- An objective assessment of the CCP
- Corrective action for problem areas
- Awareness of Consumers Power Company, NRC, and Public about the effectiveness of the CCP through reports and meetings

### Stone & Webster Corporate Audits

The CIO Program will be audited by the Stone & Webster Quality Assurance Cost & Auditing Division on a regular basis to ensure the adequacy of the CIO Program's procedures, personnel, and implementation.

### Manning Plan for CIO Team

Nine members of the CIO team are currently on site. These people have been reviewing documents; preparing checklists; and evaluating training, organizational practices, and procedures.

Plans are to have one team member assigned to each CCP team, five auditors to conduct the program evaluation function, one to three support engineers depending on the workload, two group supervisors, and the program manager. Anticipating that some 12 CCP teams will be in operation initially, a team of some 21 people will be required. When the anticipated 23 teams become operational, some 32 people will be required. These are minimum numbers and are based on a single shift work schedule. The situation is a dynamic one. As conditions change and more people are needed to carry out the provisions of the CIO Program, more people will be brought in.

### Summary

Stone & Webster has designed and constructed a number of nuclear power stations and knows the right way to do the work. The CIO Program will be carried out to ensure that the Midland plant is built in accordance with applicable codes, standards, and regulations.

Mr. J. G. Keppler Administrator, Region III U. S. Nuclear Regulatory Commission 799 Roosevelt Road Glen Ellyn, IL 60137 August 30, 1983

THIRD PARTY CONSTRUCTION IMPLEMENTATION OVERVIEW PROGRAM MIDLAND NUCLEAR COGENERATION PLANT

This letter confirms commitments made by Stone & Webster Michigan, Inc. (Stone & Webster) to NRC at the Public Meeting on August 25, 1983, at Midland, Michigan in reference to the Construction Implementation Overview Program (CIO). As stated in the meeting, Stone & Webster will:

- Implement the CIO Program in a manner consistent with NRC regulations. Program details are described in program documents previously provided to NRC and the attached copies of graphics used in the Stone & Webster presentation on August 25, 1983.
- 2. Revise the Project Quality Assurance Plan to address Stone & Webster audits of the CIO Program. An initial audit will be conducted within 90 days of NRC approval of the CIO Program followed by audits on a twice a year basis. This audit schedule will be increased if activities warrant.
- 3. Revise the Project Quality Assurance Plan to address Stone & Webster trend analysis. This trending will be conducted to ensure that sampling levels and changes thereto are consistent with the performance of Consumers Power Company.

We trust that these commitments are in agreement with your understanding of what was stated at the Public Meeting, and meet with your approval.

WELDER QUALIFICATION

PRODUCTION WELDING

DOCUMENT CHANGE CONTROL

CABLE PULLING

CONTROL OF PURCHASE MATERIAL

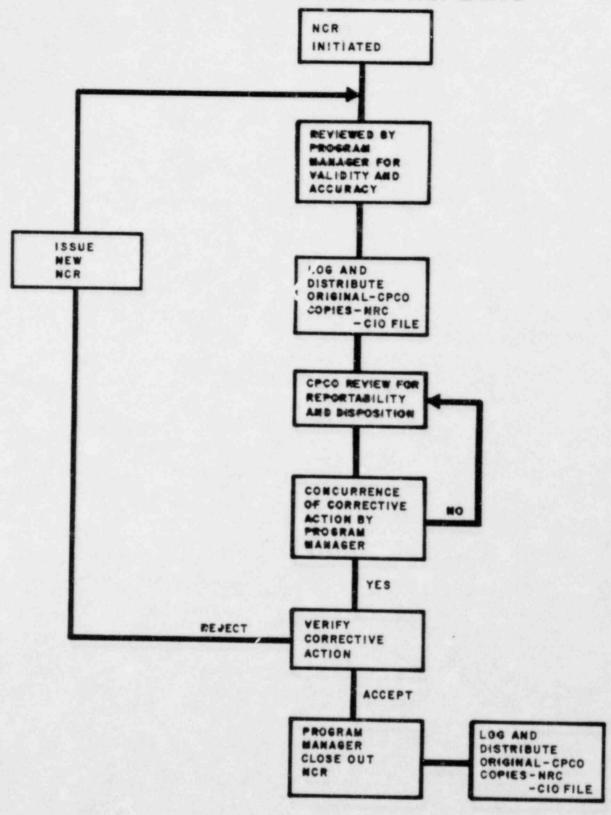

QA RECORDS

STORAGE / PREVENTIVE MAINTENANCE

CORRECTIVE ACTION FOR NONCONFORMANCE

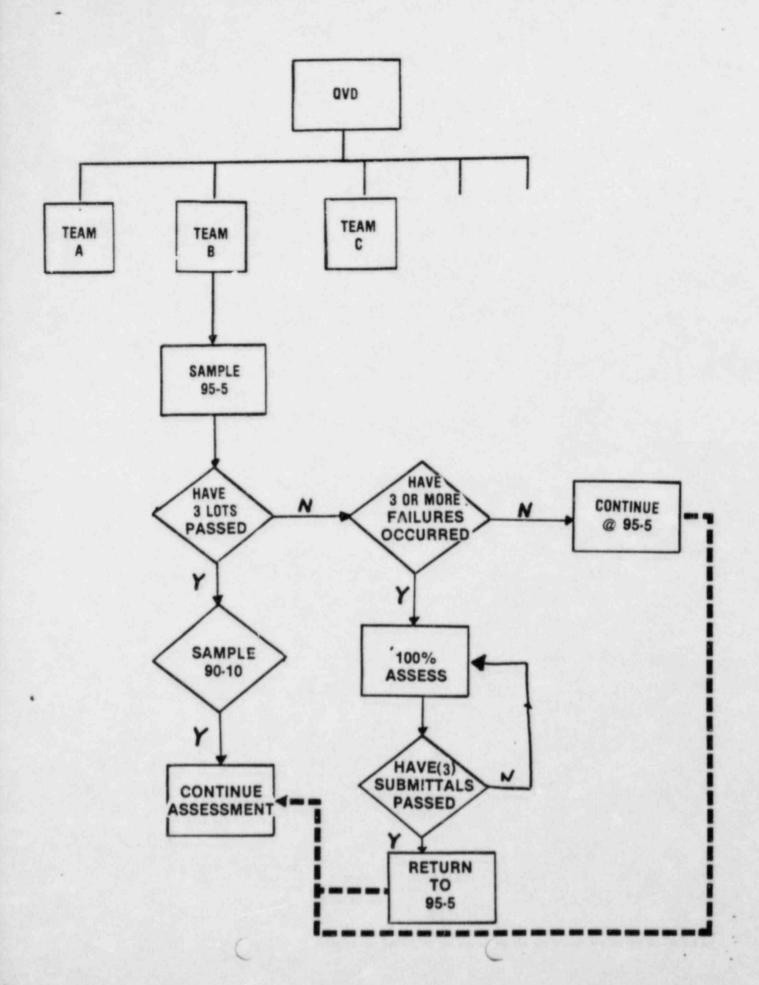

TRENDING & ROOT CAUSES

# FLOW CHART FOR NONCONFORMANCE REPORTS

# SAMPLING OVERVIEW

- SWEC WILL USE MIL-STD-105D AS THE BASIC STATISTICAL METHOD.
- COMPLIANCE BASELINE WILL BE ESTABLISHED AS FOLLOWS:
  - EACH QVP TEAM'S WORK WILL BE SAMPLED USING 95-5 CONFIDENCE FOR 1ST (3) SUBMITTALS
  - IF ALL PASS THEN SAMPLING WILL BE REDUCED TO 90-10 CONFIDENCE
  - IF A TEAM HAS SINGLE FAILURE BASED ON SIGNIFICANT ATTRIBUTE THEN RETURN TO 95-5. THIS WILL CONTINUE UNTIL (3) CONSECUTIVE PASSES ARE ACHIEVED.
  - ANY TEAM SUBMITTING (3) CONSECUTIVE FAILED LOTS WILL BE SUBJECT TO RETRAINING AND 100% INSPECTION UNTIL IT IS JUDGED SAFE TO RETURN TO SAMPLING - NORMALLY THIS WILL BE (3) CONSECUTIVE PASSED LOTS WITH NO SIGNIFICANT CONDITIONS OBSERVED.

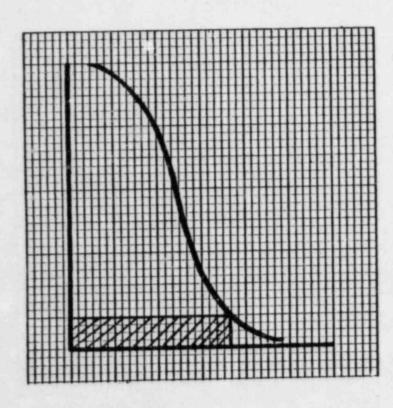

### A COMPARISON BETWEEN SAMPLE SIZES

	SAMPLE SIZE (n)		
MS-105D LOT SIZE (N)	@ 95-5	@ 90-10	@ 20%*
2 to 8	ALL	ALL	1 / 2
9 to 15	ALL	ALL	2 / 3
16 to 25	ALL	A11 to 20	4 / 5
26 to 50	ALL	20	6 / 10
51 to 90	50	20	11 / 18
91 to 150	50	20	19 / 30
151 to 280	50	32	21 / 56
281 to 500	50	50	57 / 100
501 to 1200	80	80	101 / 240
201 to 3200	125	125	241 / 640
3201 to 10,000	200	200	641 / 2000

<sup>\*</sup>Values rounded up to the nearest integer for greater confidence

### LIMITING QUALITY

- Designed for "isolated" lot vs. continuous sampling
- Provides protection by "fixing" risk of accepting "bad" products
- Provides greater discrimination by designating AQL to avoid greater than allowable proportion defective

# SAMPLING OVERVIEW

- SWEC APPROACH WILL ENSURE
  - OBJECTIVE ASSESSMENT
  - REPORTS TO NRC, CPCo, PUBLIC
  - CORRECTIVE ACTION
- PERFORMANCE WILL BE REWARDED AND ENCOURAGED BY SAMPLE REDUCTIONS, WHEN JUSTIFIED.

# SAMPLING OVERVIEW

- UPON COMPLETION OF CIO, SWEC WILL STATE:
  - THAT CPCO'S, QVP AND CCP HAVE BEEN ASSESSED AND FOUND ACCEPTABLE.
  - THAT ALL SIGNIFICANT CONDITIONS ADVERSE
    TO QUALITY HAVE BEEN IDENTIFIED AND RESOLVED.

A CONCLUSION THAT MIDLAND STATION MEETS OR EXCEEDS ALL APPLICABLE REGULATIONS, CODES AND STANDARDS.

MIDLAND ENERGY CENTER PROJECT -PROGRAMMATIC REVIEW OF MATERIAL

TRACEABILITY BY MPOAD

FILE 24.0 SERIAL 25172

Consumers DOWEL Company

INTERNAL CORRESPONDENCE

CC

MPQAD has completed a review of the procedures and systems in use at the Midland Plant for identification and control of material and components in response to a Zone 6 action item of the Construction Completion Program. An evaluation was made of the adequacy of these procedures and systems to fulfill and adhere to regulatory, code and standard requirements regarding material identification and control. The review consisted of: a search of requirement documents, procedures, specifications and instructions; personnel contact; and observations of stockrooms, storage areas and field installations. Investigations concentrated on pipe hangers and supports, structural materials, piping, and weld filler material.

Based on this review, my staff and I have concluded that the systems in use for material identification and control do provide for compliance with ASME Code requirements of identification through fabrication, and for 10CFR50 Appendix B requirements of preventing the use of incorrect material. Although the requirements are met, the degree of compliance is considered minimal. The report prepared by my staff does recommend some actions which it is believed will provide a more positive control for future activities and will lessen project vulnerability to subsequent difficulty in responding to questions of material acceptability. However, it is my judgement that the present program and the verification of material identification imposed by appropriate PQCIs complies with the commitments for this project. It is my conclusion that although certain improvements will be recommended, as noted above, there should be no constraint or holds placed on the inspection process at this time.

HPLeonard, Midland

MLCurland, Midland BMPalmer, Midland Consumers Power Company

INTERNAL CORRESPONDENCE

As part of our Construction Completion Program, MPQAD was assigned the responsibility to conduct certain programmatic reviews as a prerequisite to initiation of Phase 2 of the CCP. The purpose of this memo is to address the review conducted on material identification and control. This study has been completed under the direction of M L Curland, Principal Quality Advisor for MPQAD. The fundamental conclusion of the study is that the systems in use for material identification and control do provide for compliance with ASME Code requirements of identification through fabrication, and for 10CFR50 Appendix B requirements of preventing the use of incorrect material.

DBMiller, Midland

The detailed findings, conclusions and recommendations contained in the MPQAD report will be presented to the CCP Management Review group and selected staff in the very near future. It is the position of MPQAD that our material identification and control systems are acceptable, although certain recommendations may be made for future improvements. Additionally, since material identification and control verification is required where necessary through appropriate PQCIs, it is concluded that the program for material identification and control requirements and verification is acceptable for inspection purposes. Although some improvements will be recommended to the overall program, these are not considered a constraint to our inspection process. The ongoing larger reinspection effort and reinspections under the QVP will meet programmatic material identification and control requirements.

This position is based upon a collective review of the final draft report by my staff and upon the recommendation of M L Curland, attached.

JWCook UPLeonard

The attached memos indicate that MPQAD has completed its review of material traceability as required by Zone 6 of the CCP. As indicated in the attached, the programs presently in place are acceptable, although some recommendations for improvements for future use will be made. The details of the study and conclusions will be presented to the CCP management group for information in the near future.

I consider this CCP assignment closed.

#### SUMMARY OF RESPONSE TO S&W CIO REPORTS

#### I. S&W OPEN ITEMS PRIOR TO JUNE 30, 1983 (S&W #11)

The following items remain open from previous letters:

1. Need to supply S&W with a copy of the NRC Commitment List

Response: An initial revision of the base NRC commitment list based on the June 10 CCP letter to NRC has been provided to the QIO. S&W letter dated July 25, 1983 (S&W #15) indicates this item as closed. Updates to the commitment will be provided to the CIO as they are made.

 Need to take action on Roy A. Wells memo (Serial 22848) dated June 7 summarizing status of open items from the QVP management review.

Response: J. W. Cook letter to J. A. Rutgers, CPCo Serial 23624 dated July 13, 1983 acts on the recommendations made by R. A. Wells and concludes for the MRC (Management Review Committee) that all constraints to the QVP, other than NRC approval, have been closed.

 Need to describe and present procedures on the NCR disposition process.

Response: The NCR disposition process to be used for the QVP is the normal process as described in PSP 3.2. A revised procedure (F2-M) for preparing and processing NCR's will become effective August 30, 1983.

NCR's generated from the hanger reinspection only will have an additional step to develop a recommended disposition prior to final disposition in accordance with the above procedures. These additional procedures will be made available to the CIO. The Nutech portion of the NCR process remains open until we provide the CIO with the process. The Nutech Process was developed for the hanger reinspection program and should not be a restraint to CCP (which includes the QVP). Project Engineering will discuss process with CIO.

#### II. JUNE 30, 1983 LETTER (S&W #11) - MANAGEMENT COMMITTEE REVIEW

1. CPCo should clearly establish their position on requirements for examination after team training.

Response: The project position is that supervisor evaluation of individual on-the-job performance will determine the qualifications of each individual. Examinations following training sessions will not be used. A separate program for evaluation of training content and instructor performance has been set up. The CIO has reviewed this program and reported it as closed in Report #5 dated July 18, 1983.

 The review team should assemble their comments in one document and present their findings prior to the Management Review Committee Meeting.

Response: A similar request was made of the review team by the Chairman of the Management Review Committee. An effort will be made to schedule review team activity to allow time for preparation of a single summary document for future management reviews.

3. Restraints presented to the Management Review Committee should-be resolved prior to the MRC meeting or the meeting delayed.

Response: The review team has been identifying their open items directly to the responsible organization element prior to the Management Review Committee meeting which allows for corrections or response on each item at the MRC meeting. This approach meets the needs of the MRC and will continue to be used for future management reviews in order to maintain needed management flexibility and prior notice in scheduling meetings.

#### III. JULY 12, 1983 LETTER (S&W #12) REPORT #4

 Page 2 of Report Item 3) - "Need to identify commitments made to NRC"

Response: This is a previous open item - It is closed as described in I.l above.

2. Page 2 of Report - Item 4) - "CIO considers the list of commitments to the NRC a constraint to the QVP"

Response: This is a previous open item - It is described in I.1 above.

 Page 2 of Report - Item 5) - "CIO concerns in the conduct of training of supervisory personnel"

Response: This item is closed in S&W Report #5 dated July 18, 1983 (Item 2, page 2).

- 4. Action Items from Page 2 of S&W #12
  - Resolve items on B M Palmer's memo Serial 22897A dated 6-14-83

    Response: This was a CIO Action Item and Report #5 (S&W #14)

    addresses the memo.
  - Need job descriptions and responsibilities of CPCo personnel engaged in QVP.

Response: The job descriptions have been reviewed and the item closed (S&W Report #5 dated July 18, 1983).

3) Has a program been developed to process non-conformances?

Response: The program to process non-conformances has been covered in I.3 above.

#### IV. JULY 14, 1983 LETTER (S&W #13) - OVERVIEW OF CCP

No response required

#### V. JULY 18, 1983 LETTER (S&W #14) - REPORT #5

- Item3)a page 2 "Adequacy of Drawing (A8) large bore pipe hangers"
   Response: Closed by S&W #15
- Item 3)b page 4 "Additional verification of equipment received and installed (E2)"

Response: Even though S&W has closed this item relative to QVP, a separate program requirement is still open that would establish how to verify vendor equipment.

- 3. Item 3)c page 4 "Material traceability of installed hangers (E3)

  Response: The material traceability issue for hangers is open pending S&W review.
- 4. Page 5 of Report #5 Item 4 .

Response: This item closed. Item 4.2) from Item III above (S&W #12 - Report #4)

#### Open Action Items - Listed on Page 5 of Report #5

1) Commitment List

Response: Closed as described in I.1 above

2) Commitment List

Response: Closed as described in I.1 above

3) Management Review Committee action in R. A. Wells memo

Response: Closed as described in I.2 above

#### CPCo Required Action

1) MRC to convene to confirm or modify recommendation of MPQAD

Response: Closed as described in I.2 above

2) NCR Process

Response: Current status described in I.3 above

#### VI. JULY 25, 1983 (S&W #15) Report #6

#### Action Items

 Concern - "Adequacy of drawings - Large Bore Pipe Hangers" closed by this letter. New item opened. Advise CIO of redline NCR and its impact of QVP.

Response: The majority of the Field Redlines (FRL) in question affected pipe supports within the scope of the Hanger Reinspection Program. Approximately 5% of the FRLs affected small bore pipe drawings.

Immediately upon identification of the FRL problem, the necessary procedural controls were implemented by the affected organizations.

#### These controls include:

- Project Engineering identifying which drawings are affected and placing them on hold in accordance with EDP 4.46.
- 2) Upon notification from Project Engineering, Field Document Control issues a drawing hold cover sheet to all affected organizations on drawing distribution. This action is in accordance with FPD-1.000 Rev 16.
- 3) Quality Control has issued an "activity hold" in accordance with AAPD/PSP G-3.2, preventing any inspections to a drawing with an outstanding FRL.

These programatic controls are sufficient to preclude inspection acceptance of affected items. In addition, all of the individual holds are forecasted to be released and revised drawings redistributed by 9-8-83. For this reason, the redline issue has no quality impact on the QVP.

2) Concern - "Material Traceability of Installed Hangers".

Response: Material traceability in general is the subject of a draft report completed by the MPQAD Principle Quality Advisor. Although this draft report recommends some changes for future work, it concludes that the Project does meet the applicable requirements. A memo from the Executive Manager - MPQAD to the Management Review Committee presents this conclusion.

Since the conclusion is that material traceability requirements are currently being met, there will be no impact on reinspections during QVP or the Hanger Reinspection Program.

3) Concern - Has a program been developed ... to process NCR's?
Response: Remains open as indicated in I(3) above.

#### Open Action Items

1) CPCo believes this is closed based on I.2 above

#### VII AUGUST 1, 1983 LETTER (S&W #16) Report #7

All identified action items have been addressed in Section VI above.

#### VIII SUMMARY OF OPEN ITEMS TO DATE

- Develop vendor equipment verification program (MPQAD/SMO).
   This is not a restraint to Phase I CCP activities but has been committed to resolve prior to Phase II.
- Project Engineering to provide the CIO with procedures on the Nutech Process.

## THIRD PARTY CONSTRUCTION IMPLEMENTION OVERVIEW Approval:

Manager Quality Assurance Date 7-1-85

Sw Bannong Program Manager

Date 7-5-83

## 1.0 PURPOSE AND SCOPE

To establish a program whereby Stone & Webster performs independent evaluations and verifications of the Consumers Power Company (CPCo) Construction Completion Program, (CCP) reports progress, observations, and nonconformances to the program; specifically, to verify that:

- 1.1 Management performance is adequate in the following areas:
  - A. Establishment of the Management Review Committee
  - B. Duties and responsibilities of the Review Committee are clearly defined
  - C. Procedures governing the actions of the Review Committee are in place
  - D. Management raviews are complete, effective, and conducted in accordance with the requirements of the CCP Program
- 1.2 CCP procedures, instructions, inspection plans, records, and prerequisites for inspections/reinspections have been satisfactorily approved prior to implementation.
- 1.3 Specific CPCo commitments to the NRC are identified to facilitate tracking; dates for compliance (as appropriate) are adequately identified; appropriate action parties are clearly identified; committed actions have been satisfactorily resolved.
- 1.4 Procedures, prerequisites, and reinspection attributes in References 2.1, 2.2 and 2.3 have been approved by the Management Review Committee.

## 4.0 DEFINITIONS

4.1 Construction Completion Program (CCP)

A program to provide guidance in planning and management of design and quality activities necessary for completion of construction of the plant and verification of completed work.

4.2 Quality Verification Program (QVP)

An element of the CCP used to confirm the quality status of safety related procurement and construction activities completed and inspected by the Engineer-Constructor personnel prior to December 2, 1982.

4.3 Evaluation

Assessment of quality related activities based upon review of procedures, plans, instructions, inspection reports, test results and additional committments.

J.O.No. 14509 Midland Plant Units 1 & 2 Consumers Power Company

#### NOTE

Documentation resulting from resolution of CPCo committments to the NRC and NRC Hold Points shall be 100% reviewed to verify that proper corrective action has been accomplished.

#### 4.4 Verification

Confirming, substantiating or assuring that CCP and QVP requirements have been implemented and are active, verification actions may include documentation, hardware and management systems.

#### NOTE

Activities performed by CPCo under the CCP and QVP Programs will be monitored using random sampling techniques. The sampling will be based on a review of day to day activities in sufficient detail to ensure adequate implementation of the programs.

## 5.0 GENERAL REQUIREMENTS

- 5.1 All personnel assigned quality assurance program evaluation responsibilities shall be certified auditors in accordance with ANSI-N45.2.23 and applicable Stone & Webster procedures.
- 5.2 All personnel assigned construction verification responsibilities shall be certified inspectors in accordance with ANSI-N45.2.6 and applicable Stone & Webster procedures and possess the appropriate combination of education, experience and training.
- 5.3 The Third Party Construction Implementation Overview (CIO) program will be structured to determine, by evaluation of predetermined procedures and instructions, the quality practices utilized in the construction of the Midland Plant Units 1, 2, and the effectiveness of those practices.
- 5.4 A site team will be established to monitor the effectiveness of the Construction Completion Program. The team will consist of a Program Manager and two functional groups. One group will assess the completeness of compliance with procedures and inspection plans being used to complete the work. The other group will review certain aspects of construction activities which relate to the performance of the Quality Control Inspection Program. These two groups will use special procedures, checklists, and random sampling techniques to evaluate the following:
  - A. Adequacy and implementation of CPCo procedures regarding construction activities, personnel qualification, training programs, and organizational practices.
  - B. Compliance of Construction Completion Program teams to prescribed procedures.

J.O. No. 14509
Midland Plant Units 1 & \_
Consumers Power Company

- C. Compliance of Midland Project Quality Assurance (MPQAD) personnel to applicable procedures.
- D. Compliance of construction activities to applicable procedures.
- 5.5 The Program Manager shall maintain communications with the NRC and CPCo Site Manager. Weekly progress meetings shall be held with the NRC and CPCo to discuss progress and report on nonconformance and observations.
- 5.6 Programmatic nonconformances of a serious nature shall be immediately reported to the NRC and CPCo.

#### 6.0 PROCEDURES

- 6.1 The following procedures shall be prepared to control the activities of the Construction Implementation Overview (CIO) teams.
  - A. Quality Control Instruction 10.01 Construction Implementation Overview Assessment
- 6.2 The site teams shall develop attribute checklists for each evaluation and verification activity. Attributes shall be selected from the CCP, PQCI's, CPCo committments to the NRC and other applicable requirements.
- 6.3 Auditors assigned to conduct evaluations shall, utilizing checklists, itemize those quality practices evident in the performance of each activity.
  - The results of each evaluation shall be documented on the checklist to ensure repeatability. Summaries of the results shall be tabulated weekly for presentation to the NRC and CPCo.
- 6.4 Inspectors assigned to conduct verification, shall utilizing the checklist, monitor the activities of CPCo personnel involved in CCP and QVP activities.
- 6.5 All systems verified shall be identified and documented to assure repeatability.
- 6.6 Nonconformances identified in conjunction with this procedure shall be documented on a Nonconformance Inspection Report (NIR) and processed in accordance with Reference 3.3 of this procedure.

## 7.0 REPORTS

- 7.1 The following reports will be submitted to NRC and CPCo and S&W by the Program Manager.
  - A. Weekly Progress Reports

Midland Plant Units 1 & Consumers Power Company

- C. Final Reports on Construction Completion
- 7.2 Weekly Progress Report Weekly Progress Reports will be submitted during the weekly meeting with CPCo, and the NRC.
- 7.3 Final Report A final report will be submitted 30 days after completion of the program. The report will summarize the SWEC assessment. The final report will be submitted by the Program Manager to the NRC, CPCo and S&W.

#### CIO OBSERVATIONS OF MANAGEMENT REVIEW COMMITTEE (MRC)

MEETING SUBJECT: BULK HANGER ORGANIZATION

A meeting was convened by MRC on June 23, 1983 for discussion of the Release of Area and System Teams to start statusing. An agenda was distributed prior to the meeting.

All the members of the MRC were in attendance and actively participated in the proceedings. Key team members of CPCo, MPQAD and Bechtel were present. The handouts and the presentation covered the subject of discussion in definitive and understandable detail.

CIO reports the following observations:

1). Audit responses, once addressed should not be readdressed unless responses are inadequate. In particular the question of all training requiring an examination or qualifying test was raised at an earlier MRC meeting and again, at this session.

There appears to be two schools of thought on requirements for examinations. The audit group (CPCo) is taking the position that examinations are all encompassing while SMO favors examinations only for those personnel having accept/reject responsibilities. The position of across the board examinations or for the accept/reject responsibility only should be clearly established.

- 2). Observations by the Review team should be presented to MRC, in one document, several days prior to meeting date. This would enable MRC to respond in full at the meeting and avoid "conditional" approval of the review subject.
- 3). Restraints require expeditious resolution. The restraints presented to MRC at this session were of a minor nature and should have been cleared prior to the meeting or the meeting postponed until restraints are removed. As in (2) this would allow approval to be considered at the meeting. At present "conditional" approval by MRC is discussed.

CIO considers that preparation for Status Assessment is essentially ready for implementation. Training all personnel to all procedures and waiting for all procedures to be issued is an unnecessary restraint. If sufficient material is available, then a team should start implementation so that the results of that effort may be evaluated and fine tuned as necessary.

RE: PROCEDURE N/A	
SUBJECT CONSTRUCTION IMP	LEMENTATION OVERVIEW ASSESSMENT

#### 1.0 PURPOSE AND SCOPE

1.1 To establish a program for management planning, conducting and documenting the Construction Implementation Overview (CIO) assessment of the Construction Completion Program (CCP). This QCI shall be applicable to all phases of the CCP and may cover additional activities as directed by the SWEC Program Manager.

#### 2.0 REFERENCES

- 2.1 SWEC Third Party Construction Implementation Overview Procedure 5/19/83
- 2.2 SWEC Project Quality Assurance Plan
- 2.3 Construction Completion Program

## 3.0 ATTACHMENTS

## INFORMATION COPY

- 3.1 Evaluation Checklist (Sample)
- 3.2 Verification Checklist (Sample)

#### 4.0 GENERAL

- 4.1 This CIO program shall assure proper implementation of the CCP through a systemmatic assessment of procedures, instructions, directives, correspondence, specifications, drawings and commitments as applicable. Assessment shall confirm conformance in the development, approvals and implementation of the CCP and shall encompass program evaluation and physical verification.
- 4.2 CIO shall provide for the evaluation of the CCP in a planned and systematic manner, i.e., prepare schedules for preparation of checklists, develop checklists applicable to specific Project Quality Control Instructions (PQCI) and perform evaluations of documented inspections/activities.
- 4.3 CIO shall use the checklists to perform evaluations and/or verification of the documented inspection or activity.
- 4.4 Results of assessments shall be documented in accordance with Section 6 of this OCI.

Co1110040

#### 5.0 RESPONSIBILITIES

- 5.1 The Program Manager is responsible for:
  - Implementation and control of the overview of the CCP activities
  - Evaluating compliance and effectiveness of the program.
  - Approval of checklists
  - Participating in Management Reviews
  - Preparation of reports of progress and nonconformances for presentation to the US NRC and CPCo
  - Documenting those meetings and telephone conversations that pertain to the CCP
- 5.2 The Evaluation Supervisor shall be responsible for:
  - Developing checklists comprised of attributes based upon activities described in PQCI's, commitments and other project directives.
  - Maintaining and up-dating checklist matrices
  - Directing the implementation of the Evaluation Program
- 5.3 The Verification Supervisor shall be responsible for:
  - Developing checklists comprised of attributes based upon activities described in PQCI's, commitments and other project directives
  - Maintaining and up-dating checklist matrices
  - ° Directing the implementation of the Physical Verification Program

#### 6.0 PROCEDURE

- 6.1 Evaluation/Verification shall be performed in accordance with the following instructions:
  - 6.1.1 Attribute checklists shall be prepared utilizing the PQCI and appropriate additional data. Attribute checklists may include direction for information and guidance to the evaluator. Attributes shall be numbered sequentially, shall be clear, concise, without ambiguity and shall indicate the precise source of the attribute by page and paragraph. In addition the source data shall address any of the 18 criteria of 10CFR50 Appendix B as applicable. The CPCo team number shall be indicated in the "Responsible Organization" Column.

- 6.1.2 Review referenced documents, including correspondence, procedures, and inspection records pertinent to the CCP.
- 6.1.3 Complete the checklist attribute sheets during the assessment by entering the total number of observations made of each attribute and the number of observations found unsatisfactory, noting any remarks under "Comments". Remarks shall contain sufficient information to ensure repeatability of the observation. This information shall include identification of specifications, drawing procedures, reports, test results and nonconforming conditions and shall include copies of supporting documentation as necessary. Attributes determined to be not applicable shall be marked "N/A" and explained.
- 6.1.4 Each attribute noted as unsatisfactory shall be evaluated by the Program Manager to determine if the unsatisfactory observation warrants the issuance of a Nonconformance Identification Report (NIR).
- 6.1.5 Checklists with attributes noted as unsatisfactory that do not result in the issuance of an NIR shall be kept in an active file until reinspection determined that the attribute is considered satisfactory.
- 6.1.6 The checklist attribute sheets shall be considered as a guide for performing assessments. Attributes maybe modified or added or deleted (with explanation) as necessary to satisfy the objectives of References 2.1 and 2.2.

## 7.0 Records

- 7.1 Upon completion of all activities asssociated with a specific PQCI, the completed package (with copies of NIRs) shall be transmitted to CPCo Permanent Plant Files.
- 7.2 CIO shall maintain a working file of all documentation transmitted to CPCo Permanent Plant Files. This file maybe used for reference or review by the US NRC.

#### MANAGEMENT REVIEW COMMITTEE CONSTRUCTION IMPLEMENTATION OVERVIEW OBSERVATIONS

REFERENCES - MEMO - R. Wells to J. Cook June 7, 1983 Meeting Agenda June 1, 1983

The agenda (copy attached) consisted of 7 items the first 4 of which were satisfactorily dispositioned at the April 29 meeting.

Item 5 - (Management Review Audit Team) identified 23 observations and the validity of these observations was accepted. Responsibility and target dates were assigned to each observations.

Item 6 - (Constraints) addressed the 23 observations and their impact on the Quality Verification Program (QVP)(see memo attached). Subsequent correspondence indicates that MPQAD categorizes these observations as "constraints" to QPV or "Desirable as soon as possible," 14 observations falling into the first category and 8 into the latter. The remaining observations, which concerns the development of a matrix of committments made by CPCo to NRC is considered as a constraint by the Management Review Audit Team and "Desirable ASAP" by MPQAD.

CIO agrees with these determinations and considers that the development of a matrix indicating committments to the NRC, responsibility and target date is a constraint to QPV.

Item 7 - (Recommendations) addresses 23 observations in subsequent correspondence. MPQAD recommends that the QPV is accepted. The recommendation is based upon the fact that the 14 "constraint" observations relate to procedures that are in draft or review and that issue of the procedures will remove constraints. The committee is expected to take appropriate action on the "constraint" issue. All items on the agenda were satisfactorily dispositioned.

During subsequent discussion CPCo indicated that trend analysis of NCRs would be performed by a consultant and in response to a question by CIO stated that procedures and job descriptions for that consultant would be available. CIO also questioned if job descriptions were available for MPQAD personnel implementing the QVP and was advised that the descriptions are available. CIO considers the QVP acceptable with the following conditions.

- (a) Copies of Job descriptions of MPQAD personnel assigned QVP duties is requested
- (b) The matrix of CPCo committment to NRC should be complete
- (c) The 14 requred to resolve Management Review Team Observations should be approved and issued

FILE 23.0 SERIAL 22848 Consumers Power Company

INTERNAL CORRESPONDENCE

CC

BPalmer

SBaranow (S&W) w/Reference

Reference: CPCo Serial 22834 dated 6/3/83 - Midland Energy Center Project Quality Verification Program Management Review

On June 3, 1983, you were copied on a letter to J A Rutgers from Brien Palmer for me which provided minutes of the June 1, 1983, QVP Management Review and a final punchlist of open items pertaining to implementation of the QVP. The punchlist of open items was included as Attachment C to the minutes and to the best of my knowledge, captures all of the open issues covered by Reference A through F as noted on the cover sheet to Attachment C. It should, therefore, be a complete list. The task of our management team is to identify which of the open issues are truly constraints to implementing the QVP. In order to help us reach a conclusion, I am recommending below which of the items on Attachment C that I see as a constraint and which are desirable but not a constraint:

#### Item

Forecast Completion Date

#### 1. Constraints

4, 7, 8, 9, 11, 12, 16, 17, 18, 19, 20, 21, 22 and 23 - All of these relate to resolution of comments on and approval/ issue of procedures

6/13/83 - Issue Date

#### 2. Desirable As Soon As Possible

1	- PQCI Improvements	6/9/83
2, 3	- IR Data Base Improvements	7/31/83
5	- Material Traceability (Advise Mgmt)	6/10/83
6	- Inspection Process Control System	8/5/83
10	- Topical Report Organization Changes	6/22/83
	- Commitment Matrix	6/10/83
14	- Issue QVP	Closed
15	- Inspection Safety on T/O Systems	No Date Yet

(\*The Management Review Team recommends this as a constraint)

My analysis of the above indicates that when the procedures now in draft stage are issued, that there will be no constraints to QVP implementation and I recommend this position to the Management Review Group.

I am requesting that J W Cook take action as he feels appropriate as chairman of the Management Review Group to confirm or modify my recommendation to establish the Management Review Group's position.

jln

June 17, 1983 J.O. No. 14509 NRC File #83-06-17

SUBJECT: SPATIAL SYSTEMS INTERACTION PROGRAM (SSIP/S)

Subject program is the responsibility of CPCo and consultants Mark G. Jones Engineering Consultants Inc. (MGJEC).

CIO conducted an evaluation of (MGJEC) Training Program on June 8, 1983 and determined that the completion of the Training Program, and the preparation and issue of Walkdown Implementing procedures is satisfactory. CIO therefore considers that the subject program may be implemented immediately.

The Training Program consisted of 3 phases - (1) Classroom study and review of procedure (2) Simulated walkdown and (3) A written test. All candidates successfully completed the training. In addition on June 8, 1983 CIO attended a presentation/discussion of the policies and methods utilized in the SSIP/S. Fifteen procedures have been approved by CPCo and issued by (MGJEC).

The checklist with supporting documentation is on file in this office.

#### PROJECT QUALITY ASSURANCE PLAN

Approvals:

Program Manager

Dates:

6-13-83

Chief Engineer

Engineering Assurance

6-8-83

Celly 18.23. 6-7-83

Manager ) d Quality Assurance

#### SCOPE

This procedure describes the quality assurance plan for activities performed by Stone & Webster Engineering Corporation (SWEC) for the Consumers Power Company's (CPCo) Midland Plant- Units One and Two. The work involved in this third party overview is described in applicable CPCo specifications and procedures and shall be accomplished in the following manner:

- a. Development of an overview program and preparation of a Project Quality Plan.
- b. Review of the design and construction documents to gain familiarity with the work.
- c. Evaluation of the adequacy of technical and related administrative construction and quality procedures.
- d. Evaluation of the degree of compliance with technical and administrative construction and quality procedures.
- e. Daily reviews as necessary with the Owner to obtain any clarifying information and project documents that are needed to carry out this program. The Owner and SWEC will establish a specific communication plan at the start of the work.
- f. Submittal of brief weekly progress reports and a final report to the NRC with a copy to CPCo.
- Submittal of monthly reports of findings and observations to the NRC with a copy to CPCo.

- h. Monthly reports and the final report shall be reviewed by a senior level overview committee in accordance with the Project Program Plan.
- SWEC will not be responsible for implementing corrective action, however, their professional opinion may be requested.

## PROGRAM REQUIREMENTS AND ACTIVITIES

#### ORGANIZATION

The overall SWEC organization is depicted in <u>SWSQAP 1-74A</u> (Section I). A Program Manager will function as the site leader for the third party overview. Project organization is described in the Project Program Plan.

#### II. QUALITY ASSURANCE PROGRAM

The overall SWEC quality assurance program is designed to provide assurance that all SWEC activities are accomplished in a controlled manner. The SWEC corporate QA program complies with 10CFR50, Appendix B, and NRC Regulatory Guides, and is described in an NRC approved topical report, SWSQAP 1-74A, "Standard Nuclear Quality Assurance Program."

This quality assurance plan shall be maintained up-to-date to reflect any changes in the scope of SWEC work.

This quality assurance plan identifies the procedures which implement the overall QA program as it applies to the SWEC scope. Insofar as possible, applicable standard SWEC procedures will be used to govern the work. When standard procedures do not fit project circumstances, project procedures will be issued to govern the work. Variances from standard SWEC procedures will be approved according to Quality Standard (QS) 5.1 and Engineering Assurance Procedure (EAP) 5.7.

Personnel performing activities in accordance with this plan requiring qualification and certification will be qualified and certified in accordance with Quality Standard 2.12 and Quality Assurance Directive 2.5.

#### III. DESIGN CONTROL

(Not within the SWEC scope)

## IV. PROCUREMENT DOCUMENT CONTROL

Consulting Services, as required, are procured in accordance with Engineering Assurance Procedures 4.1 and 4.15, which are supplemented by Project Procedure (PP) (LATER).

## V. INSTRUCTIONS, PROCEDURES, AND DRAWINGS

SWEC procedures, including variances, are prepared and controlled in accordance with Section II of this QA plan.

(Instructions, drawings and specifications are not within the SWEC scope).

#### VI. DOCUMENT CONTROL

(Not within the SWEC scope)

## VII. CONTROL OF PURCHASED MATERIAL, PARTS, EQUIPMENT, AND SERVICES

(Control of Purchased Material, Parts and Equipment - not within the SWEC scope).

Control of Services is in accordance with Engineering Assurance Procedure 7.1.

## VIII. IDENTIFICATION AND CONTROL OF MATERIAL, PARTS, AND COMPONENTS

(Not within the SWEC scope)

#### IX. CONTROL OF SPECIAL PROCESS

(Not within the SWEC scope)

#### X. INSPECTION

Quality Assurance monitoring of the construction and quality activities is performed by surveillance of on-going work.

### XI. TEST CONTROL

(Not within the SWEC scope)

#### XII. CONTROL OF MEASURING AND TEST EQUIPMENT

(Not within the SWEC scope)

#### XIII. HANDLING, STORAGE, AND SHIPPING

(Not within the SWEC scope)

### XIV. INSPECTION, TEST, AND OPERATING STATUS

(Not within the SWEC scope)

#### XV. NONCONFORMING MATERIAL, PARTS, OR COMPONENTS

Nonconformances discovered by SWEC during the monitoring process are reported in writing to the NRC with copy to CPCo.

#### XVI. CORRECTIVE ACTION

Reporting under 10CFR50.55(e) is accomplished in accordance with QS-16.2 and EAP-16.2.

Reporting under 10CFR21 is accomplished in accordance with QS-16.3 and EAP-16.3. T-391

REV PREPARED BY QCI NO. DATE 6/14/83 STONE & WEBSTER . Bearham DIVISION LOCATION FOC MNPP QUALITY APPLICABILITY APPROVED BY 6/14/83 La Burnow CONTROL N/A RE: PROCEDURE INSTRUCTION SUBJECT NONCONFORMANCE IDENTIFICATION AND REPORTING

#### 1.0 PURPOSE

1.1 To describe the system for initiating, processing, distributing and controlling Nonconformance Identification Reports (NIR), documenting field nonconformances.

#### 2.0 SCOPE

This instruction applies to nonconformances identified by Construction Implementation Overview (CIO) personnel during evaluation and verification of activities associated with the implementation of Phase I and Phase II of the Construction Completion Program (CCP).

#### 3.0 REFERENCES

- 3.1 SWEC Third Party Construction Implementation Overview May 19, 1983

#### 4.0 ATTACHMENTS

- 4.1 Nonconformance Identification Report (NIR)
- 4.2 Instructions for completion of the NIR report
- 4.3 NIR Log Summary

#### 5.0 DEFINITIONS

5.1 Nonconformance - A deficiency in characteristic, documentation or procedure which renders the quality of an item unacceptable or indeterminate. Examples of nonconformance include: Physical defects, test failures, incorrect or inadequate documentation, or deviation from prescribed processings, inspection or test procedure.

#### 6.0 PROCEDURE

- 6.1 Nonconformances that are observed by (CIO) personnel and determined to have been previously identified by Consumers Power Company (CPCo.) or their Constructors shall not be reported.
  - Note Previously reported nonconformances will normally be identified by number on the Quality Control Inspection Records (QCIR) which are attachments to Project Quality Control Instructions (PCCI).
- 6.2 Nonconformances which have not been previously identified by CPCo or their Contractors shall be reported on a Nonconformance Identification Report (NIR).

- 6.3 NIRs shall be evaluated for potential reportability under 10CFR 50.55e and/or 10CFR Part 21 by the Program Manager. The Program Manager shall transmit to CPCo a copy of the NIR and a brief explanation outlining the reason(s) why it should be evaluated by CPCo.
- 6.4 Upon concurrence by the Program Manager, the original shall be transmitted to CPCo for processing in accordance with MPQAD procedure N-6, "Processing of Construction Implementation Overview Deficiencies." A copy of the NIR shall be transmitted to NRC site representative for information. Copies of NIRs shall remain in the CIO files for tracking purposes.
- 6.5 The Program Manager shall maintain communication with CPCo to determine when resolutions of nonconformances are accomplished.
- 6.6 Upon notification from CPCo that the nonconformance has been resolved, (CIO) personnel shall verify that corrective actions have been accomplished. After verification, the NIR shall be closed with a brief description of the corrective action accomplished and shall signify concurrence by signing and dating the NIR.
- 6.7 If the corrective action is considered to be unsatisfactory, the iniatator shall issue a new NIR which shall be processed in accordance with paragraph 6.4.
- 6.8 A weekly report showing the status of NIRs shall be sent to the US NRC with a copy to CPCo.

#### 7.0 RECORDS

- 7.1 Closed NIRs shall be distributed as follows:
  - ° Original of NIR and MPQAD NCR to CPCo permanent plant files
  - ° One copy to US NRC
  - ° One copy to CIO files
- 7.2 Other records shall be distributed as follows:
  - ° Originals of completed summary logs to CPCo permanent plant files
