Dear Mr. Lee:

SUBJECT: FORT ST. VRAIN NUCLEAR GENERATING STATION, AMENDMENT NO. 43
TO FACILITY OPERATING LICENSE DPR-34

The Commission has issued the enclosed Amendment No. 43 to Facility Operating License DPR-34 for the Fort St. Vrain Nuclear Generating Station in response to your application for amendment dated March 14, 1984 (P-84067). This application superseded, in its entirety, your April 19, 1983 (P-83148) application.

The amendment revises the Technical Specifications to: 1) clarify the actions to be taken when various instruments are inoperable; 2) correct typographical and reference errors; 3) allow flexibility in the required moisture monitoring instrumentation at low power levels; and 4) allow the use of previously approved compensatory procedures during maintenance on the moisture monitors.

A copy of the Safety Evaluation supporting this amendment is also enclosed. The notice of issuance will be included in the Commission's next monthly Federal Register notice.

Sincerely,

Original Signed By
Philip C. Wagner

Philip C. Wagner, Project Manager
