Inspection Summary:

Inspection on January 13-17, 1992, (Report No. 50-305/92002(DRSS))

Areas Inspected: Routine, announced physical security inspection involving Management Support; Protected and Vital Area Barriers, Detection and Assessment Aids; Protected and Vital Area Access Control of Personnel, Packages and Vehicles; Alarm Stations and Communications; Compensatory Measures; Training and Qualification; and a review of previous inspection findings.

Results: The licensee was in compliance with NRC requirements within the areas inspected.

One finding was identified regarding a response function of the security computer during certain search functions. Seven previous security-related open items were reviewed. Four of the open items were closed and three will remain open.

We have concluded that the security program was adequately implemented and managed. Management attention to and involvement in security activities are good. Licensee resources are adequate and reasonably allocated. The Training and Qualification program met regulatory requirements. Security personnel observed were knowledgeable of their duties and responsibilities and tested security equipment performed as required.
