Docket No. 50-293

Boston Edison Company  
ATTN: Mr. Roy A. Anderson  
Senior Vice President-Nuclear  
Pilgrim Nuclear Power Station  
RFD #1 Rocky Hill Road  
Plymouth, Massachusetts 02360

Dear Mr. Anderson:

Subject: NRC Inspection Report No. 50-293/91-29

This refers to the safety inspection conducted by Messrs. J. Macdonald, A. Cerne, and D. Kern of this office November 12 to December 31, 1991 at the Pilgrim Nuclear Power Station, Plymouth, Massachusetts. Areas relevant to the health and safety of the public examined during this inspection are described in the NRC Inspection Report. The results have been discussed with Mr. E. Kraft and other members of your staff at the conclusion of the inspection period.

In the areas of plant operation, maintenance and surveillance, Reactor Water Cleanup system leaks, and the resultant system component and instrumentation actuations, challenged several plant departments to not only conduct the correct immediate response, but also initiate the appropriate troubleshooting activities and coordinate the planning for long term corrective measures. Effective communications and good interdisciplinary team work were observed during your efforts to respond to these events over an extended period of time. External communications, both written and oral, with the NRC and the control of vendor activities were likewise observed to have been effectively handled. Management attention to these issues, as well as to the overall direction of plant response, was noted.

Your cooperation with us is appreciated.

Sincerely,

ORIGINAL SIGNED BY  
James C. Linville, Chief  
Projects Branch No. 3  
Division of Reactor Projects

Enclosure: NRC Inspection Report No. 50-293/91-29
