(DATE)

I, Joseph D. Kane, hereby make the following statement to Charles H. Weil, who has identified himself to me as an Investigator of the United States Nuclear Regulatory Commission. I make this statement freely with no threats or promises of reward having been made to me.

I have been involved with the Midland project since November 1979. My position is Principal Geotechnical Engineer - involved with the safety review in the field of geotechnical engineering.

I did attend the March 10, 1982 meeting with Consumers on resolving the underpinning operations that require G-listing. During the course of the March 10 meeting I do recall a statement by Mr. A. Boas that indicated that monitoring instrumentation had been installed. This statement was given by Mr. Boas as a side comment to the main discussion which was focused on G-listing of important underpinning operations. In my opinion the statement by Mr. Boas was given as a status of instrumentation installation in a very general sense and was not intended to specifically identify the instrumentation which had already been installed.
