

~~LIMITED DISTRIBUTION~~

April 5, 1995

Note to: J. Ulie, R. Paul, TSI Investigative Task Force
Thru: Conrad McCracken, Chief, Plant Systems Branch
From: Ralph Architzel, Chief Section C, Plant Systems Branch
Subject: MATERIAL RECEIVED FROM COMMANCHE PEAK BY REGION IV

As I discussed the other day, Jit Singh provided me the attached information that was faxed to him in his capacity as a Region IV inspector with fire protection inspection responsibility for Commanche Peak.

The fax appears to document results of TSI's ad-hoc testing performed with upgraded joints as detailed in TSI's May 8, 1991 letter. I'm not sure what the drawings are about - they look similar to the CP test articles but CP did not stitch joints as per the drawings nor did they use external stress skin as depicted. Therefore I'm only forwarding these to you for information.

cc: K. Walker
