

MAY 31 1984

Docket No. 50-289

GPU Nuclear Corporation  
ATTN: Mr. H. D. Hukill  
Director, TMI-1  
P.O. Box 480  
Middletown, Pennsylvania 17057

Gentlemen:

Subject: Inspection 50-289/84-11

Between April 10 and May 8, 1984, Mr. F. Young, and other representatives of the NRC, conducted a routine safety inspection of activities authorized by NRC License No. DPR-50 at your facility. The attached NRC Region I Inspection Report described the areas examined. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. At the conclusion of the inspection, Mr. Young summarized the inspection findings to Mr. R. Toole and other members of your staff as noted in the inspection report.

The results indicated that a certain activity associated with control of modification of your facility apparently was not performed in full compliance with NRC requirements and your own station procedures. The enclosed Notice of Violation (Appendix A) describes the apparent violation, categorized by severity level in accordance with NRC Enforcement Policy (10 CFR 2, Appendix C). You should follow the instructions in Appendix A in preparing your response to the Notice.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1). The telephone notification of your intent to request withholding, or any request for an extension of the 10 day period
