TEXAS UTILITIES SERVICES INC. Log # TXX-3578
File # 905.4

October 7, 1982

Mr. S. B. Burwell Licensing Project Manager U. S Nuclear Regulatory Commission Office of Nuclear Reactor Regulation Washington, D.C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION
PRESERVICE INSPECTION AND PUMP AND VALVE
TESTING PROGRAMS

Dear Mr. Burwell:

Enclosed are three copies of the CPSES Preservice Inspection Program and three copies of the CPSES Pump and Valve Testing Program (including three sets of Pump and Valve Drawings). A copy of the Preservice Inspection Program has also been sent to Tom Taylor at Battelle Northwest and to the CPSES NRC resident inspector.

The Preservice Inspection Program is complete with the exception of any additional relief requests discovered during the performance of the inspection, and the possible use of reactor vessel shop examination data in lieu of field preservice inspection.

The Pump and Valve Testing Program is preliminary and does not as yet reflect our intention to upgrade to the 1980 code. A final version will be submitted no later than six months prior to commercial operation.

Sincerely,

J. S. Marshall
