May 23rd

Dear Sir:

I'm writing as a representative of the public who is untrusting of Commonwealth Edison. I have a fear of Com. Ed. being given their license because of the massive amounts of money they've invested, as well as on the basis that it would be impracticable to close them down when they are so close.

What I'm really concerned about is the unsafety of nuclear plants to the public and the environment.

I would be at the hearing on the 30th, but that's the day my baby is supposed to be born. I live so far from Rockford in case the date is right.
