

August 24, 1995

Mr. John Cook, Vice President
Clinton Power Station
Illinois Power Company
Mail Code V-275
P. O. Box 678
Clinton, IL 61727

SUBJECT: INSPECTION REPORT NO. 50-461/95010(DRP)

Dear Mr. Cook:

This refers to the inspection conducted July 14 through July 25, 1995, at the Clinton facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements.

The inspection included an assessment of the identification, resolution, and prevention of problems. The inspection consisted of a selective examination of procedures and representative records, observations of activities, and interviews with personnel.

Overall, we determined that the performance of the programs to identify and resolve problems was good. The identification of problems and problem trends by the Nuclear Assessment Department was a strength. The effectiveness of the corrective actions program was good; however, some challenges were identified. The general theme of those challenges was the prioritization of routine work.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
