Re: 10CFR71.31

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Gentlemen:

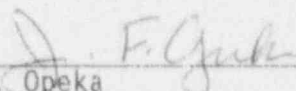

Millstone Nuclear Power Station, Unit No. 2
Quality Assurance Review of Safety Analysis Report Calculations

In a letter dated December 23, 1991,⁽¹⁾ Northeast Nuclear Energy Company (NNECO) submitted, on behalf of Millstone Unit No. 2, a Safety Analysis Report (SAR) for shipment of Millstone steam generator subassemblies as Type A transport packages.

In this letter, it was noted that Chem-Nuclear Systems, Inc. (CNSI), had not completed quality assurance review of calculations used in the SAR. These reviews have now been satisfactorily completed in accordance with CNSI procedures, and no revisions to the SAR are necessary. We remain available should you have any questions regarding this matter.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

J. F. Opeka
Executive Vice President

cc: T. T. Martin, Region I Administrator
G. S. Vissing, NRC Project Manager, Millstone Unit No. 2
W. J. Raymond, Senior Resident Inspector, Millstone Unit Nos. 1, 2, and 3
C. E. MacDonald, Chief, Transportation Branch, Division of Safeguards and
Transportation, NMSS
E. M. Kelly, Chief, Reactor Projects Section 4A, Region I

(1) J. F. Opeka letter to U.S. Nuclear Regulatory Commission, "Millstone Nuclear Power Station, Unit No. 2 Application for Certification of Steam Generator Subassemblies As Type A Packages for Transportation to Disposal Site," dated December 23, 1991.
