NUCLEAR LICENSING & SAFETY DEPARTMENT

U.S. Nuclear Regulatory Commission Office of Nuclear Reactor Regulation Washington, D. C. 20555

Attention: Mr. Harold, R. Denton, Director

Dear Mr. Denton:

SUBJECT: Grand Gulf Nuclear Station

Units 1 and 2

Docket Nos. 50-416 and 50-417

License No. NPF-13

File: 0260/L-860.0/L391.0 Comparison of Grand Gulf and

Kuo Sheng Technical Specifications AECM-84/0329

During the March 20, 1984, Commissioners' Briefing, Commissioner Gilinsky suggested that Mississippi Power & Light Company (MP&L) perform a comparison of the scope of the Grand Gulf Nuclear Station and the Kuo Sheng Technical Specifications. This submittal documents the completion and results of that comparison.

MP&L requested Bechtel and General Electric to perform the BOP and NSSS portions of the comparison since these organizations were involved in the development of the Kuo Sheng Technical Specifications. The intent of the effort was to identify and resolve significant differences between the scope of the Kuo Sheng and Grand Gulf Technical Specifications. Bechtel and General Electric identified no significant differences. The few differences which were identified during the comparison were generally resolved as plant unique and none were safety significant.

MP&L believes that the successful completion of this effort provides additional assurance that the Grand Gulf Nuclear Station Unit 1 Technical Specifications are complete and adequate. Please advise if you have any questions regarding this submittal.

Yours truly,

8406200033 840618 PDR ADOCK 05000416

L. F. Dale
