

June 6, 1984

Docket No. 50-298

Mr. J. M. Pilant, Technical
Staff Manager
Nuclear Power Group
Nebraska Public Power District
Post Office Box 499
Columbus, Nebraska 68601

Dear Mr. Pilant:

SUBJECT: RESPONSE TO NUREG-0737, ITEM II.K.3.18,
ADS MODIFICATION

Re: Cooper Nuclear Station

By letter of June 3, 1983, the NRC requested Nebraska Public Power District to comply with the requirements of NUREG-0737, Item II.K.3.18 by choosing between two alternative modifications that the staff found acceptable.

As a result, Nebraska Public Power District submitted a letter dated July 22, 1983, that commits the utility to modifying the ADS logic by eliminating the high drywell pressure permissive and adding a manual inhibit switch. This modification was found acceptable by the staff in its Safety Evaluation enclosed in its letter of June 3, 1983.

Based on your July 22, 1983 commitment, we consider this issue to be closed.

Sincerely,

Original signed by/

Gomenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
