Dear Mr. Crouse:

SUBJECT: SUPPLEMENT 1 TO NUREG-0737: REQUEST FOR MODIFICATION
OF COMMISSION ORDER DATED FEBRUARY 21, 1984

By letter dated March 20, 1984 (No. 1033), and supplemented by letter dated May 10, 1984 (No. 1047), you requested that we extend the completion dates for certain items contained in the Commission Order dated February 21, 1984 relating to Supplement 1 to NUREG-0737. Specifically, you request that the submission dates for the DCRDR Summary Report and the report discussing the application of Regulatory Guide 1.97 be extended from April 15, 1984 to June 30, 1984. Your letter also requests that the submittal date for implementation schedules for design improvements identified in these reports be extended from April 15, 1984 to January 31, 1985.

In taking this action, we reviewed the justifications you provided for the delays in the submission dates for the two reports. We found that these justifications provided adequate basis for modification of the Commission's Order. We also found that the delays requested are relatively short and should have little impact, if any, upon the final implementation of the programs for design improvements in the control room and instrumentation systems. We have granted the delays requested above. A copy of the extension decision is enclosed.

Sincerely,

"ORIGINAL SIGNED BY:"

George W. Rivenbark, Acting Chief
Operating Reactors Branch #4
Division of Licensing

Mr. Richard P. Crouse

- 2 -

In any event, the meeting to discuss the status of numerous NUREG-0737 items was not the proper way to request changes in schedules for actions which you had ample prior knowledge would be subject to a Commission Order. It is the licensee's responsibility to assure adequate and timely communication of such information to the NRC via proper documentation. You are urged to take appropriate steps to assure that in the future the NRC is fully informed (including adequate justification and compensatory measures to be taken) in a timely manner of possible delays in meeting safety commitments.

A copy of the modified Order is being filed with the Office of the Federal Register for publication.

Sincerely,

John F. Stolz, Chief
Operating Reactors Branch #4
Division of Licensing
