1   Tape 160, Side A

2   VOICE: [Inaudible.]

3   [Tone.]

4   [Pause.]

5   [Tone.]

6   [Pause.]

7   [Tone.]

8   [Pause.]

9   [Tone.]

10   VOICE: Good morning.

11   VOICE: Hello.

12   VOICE: [Inaudible.]

13   [Tone.]

14   VOICE: Morning.

15   VOICE: [Inaudible.]

16   VOICE: Good morning.

17   VOICE: Want to start?

18   VOICE: The first thing you need to know is

        3005
19   [inaudible] down here is messed up, and it's been reported.

20   So, we won't be able to use that until we get it fixed.

        UNIT 1
21   [Inaudible] 100 percent. Did another leak read

22   last night; basically the same values as before, a little

23   bit lower on the unidentified.

24   [Tone.]
                    5BB
25   VOICE: [Inaudible] about two-tenths less but

PAGE 1 OF 48 PAGE(S)

1   They don't have the numbers.

2   _ALM_ VOICE: We went -- they've got the data. They

3   were [inaudible] _telecopied_ all the data.

4   _Frederick_ VOICE: Somebody changed [inaudible]. _it to say valid starts._

5   VOICE: Yeah, I know. That was the new rev. We

6   initiated that [inaudible] that was ~~out and~~ some _but I think at_

7   ~~requirements~~ by George, and McCoy was expecting it, and now _request_

8   [~~inaudible~~]. _there all involved._

9   [Pause.]

10   _Frederick_ VOICE: I won't know until he gets through. He's

11   been in the vault since sometime past midnight.

12   _Amy_ VOICE: What's he looking at? [Inaudible] logs? _Control_

13   VOICE: Everything.

14   VOICE: [Inaudible.]

15   _Frederick_ VOICE: All the logs that supposedly exist on it.

16   VOICE: [Inaudible.]

17   VOICE: [Inaudible.]

18   _Amy_ VOICE: [~~Inaudible.~~] Two logs and then one set of _THERE'S THREE LOGS. I MEAN THERE'S NOT 3 LOGS,_

19   data sheets. _THERE'S A_

20   _Amy_ VOICE: [Inaudible.] _ss log   control log_

21   _Amy_ VOICE: [Inaudible] data sheets they're supposed

22   to fill out when they [inaudible].

23   _Frederick_ VOICE: There's also supposed to be a start log,

24   another procedure. Every time they start the diesel

25   [inaudible].

26

1   _Am_ VOICE: That's -- that's what the data sheets are.

2   _Frdovsky_ VOICE: Those are the -- well, there is also a set

3   of readings they take on the diesel while it's running.

4   That's what I call a log, the log of readings.

5   _Am_ VOICE: I'm not counting that one. I'm counting

6   the one that --

7   _Frdovsky_ VOICE: There's another one -- yeah, there's

8   another one --

9   VOICE: [Inaudible.]

10   VOICE: -- that we started.

11   VOICE: The time and results of the diesel start.

12   VOICE: Yeah.

13 _Am_ VOICE: And then they take -- then they send those

14 data sheets to Kenny Stokes. Then Kenny Stokes gets them

15 sometime later and reviews them and says, okay, that's a

16 valid one, that's an invalid one, that's a failure.

17 _Frdovsky_ VOICE: One of the things we've got to do is find

18 out if there is a sheet for every time it starts.

19 _Am_ VOICE: There is not a sheet for every time it

20 starts.

21 _Frdovsky_ VOICE: That's probably a reason -- that's

22 probably one of the reasons why the number won't jibe.

23 _Am_ VOICE: That is a reason why the numbers won't

24 jibe, but that is not the reason the -- the information is

25 false that we provided.

Frdovsky -- Oh I know

1   *Frederich* VOICE: It's an indicator of the fact that we are

2   probably sloppy in what we've done.

3   VOICE: That's one of the reasons we ended up with

4   discrepancies.

5   VOICE: The reason why --
     The control room
6   *Frederich* VOICE: [Inaudible] log is not accurate.

7   VOICE: Yeah.

8   VOICE: But the reason these are not accurate --

9   *AM* VOICE: I talked about the same thing yesterday.

10   [Inaudible] exist. Okay? But the reason why we provided

11   false information to the NRC is because we used the control

12   logs, and we made mistakes. We made mistakes for some

13   reason.

14   You know, I don't know if we tried to stretch the

15   information to say more than what it really was or if we

16   counted them wrong or whatever, but we used the -- the
     (control room
17   [inaudible] information, and we made mistakes. That's the

18   reason.
                    I know but
19   *Frederich* VOICE: [Inaudible.] I think what Hairston
     looking for is probably
20   [inaudible]. If we did everything we were supposed to do by

21   our procedures, why would a reasonable person not be able to

22   add the numbers up, more than one reasonable person, be able
                            and to come out with the same answer
23   to not add the numbers up [inaudible]?
                                            J.Ban & GB
24   VOICE: There is no reason why any [inaudible]
                  CONTROL
25   could not have taken the ∧ logs and made correct statements

1   based on those. If starts were missing from the control

2   logs, well that would have just been more starts.

3   *Fred.* VOICE: Yeah.

4   *Am* VOICE: You could have made at least a

5   conservative statement.

6   *Fredricks* VOICE: Right. Your statement should have been

7   conservative.

8   *Am* VOICE: It would have been conservative if

9   information was missing.

10   *Fredrich* VOICE: Right. I would agree with that. But I

11   won't know until he's -- he's through, and we're not

12   starting with somebody else's data.

13   We're generating our own, so that we don't sit

14   around trying to justify somebody else's numbers, because

15   that biases you one way or the other.

16   *Am* VOICE: Right.

17   *Fredricks* VOICE: It's better to go with your own objective

18   number and then sit down and compare the two and figure out

19   why they don't match.

20   I think we're going to find that we -- even though

21   we were starting it -- started it and run it for three

22   minutes and started it and run it for five minutes and they

23   were ten minutes apart, the control room still should have

24   filled out a sheet every time it was started up, and they

25   probably didn't.
