Docket Nos. 50-327
and 50-328

Mr. Dan A. Nauman
Senior Vice President, Nuclear Power
Tennessee Valley Authority
6N 38A Lookout Place
1101 Market Street
Chattanooga, Tennessee 37402-2801

Dear Mr. Nauman:

SUBJECT: RESPONSE TO GENERIC LETTER 91-11, "RESOLUTION OF GENERIC ISSUE 48, 'LCO'S FOR CLASS 1E VITAL INSTRUMENT BUSES,' AND 49, 'INTERLOCKS AND LCO'S FOR CLASS 1E TIE BREAKERS,' PURSUANT TO 10 CFR 50.54(F)" FOR SEQUOYAH NUCLEAR PLANT UNITS 1 AND 2 (TAC NOS. M82468 AND M82469)

On July 18, 1991, the NRC issued Generic Letter (GL) 91-11 that contained the staff resolution of Generic Issues 48 and 49. The GL required that licensees certify that procedures exist that contain time limitations and surveillance requirements for vital instrument buses (VIBs), inverters or other onsite power sources for VIBs, and tie breakers. If procedures do not exist, a justification demonstrating the reasons why the controls are not needed is required.

By letter dated January 14, 1992, TVA responded to the GL and indicated that appropriate administrative controls and surveillance requirements are in place at your plant.

The staff has reviewed your response and finds that it meets the reporting requirements set forth in GL 91-11. This completes the staff's activities and closes TAC Nos. MB2468 and M82469.

Sincerely,

Original signed by

David E. LaBarge, Senior Project Manager
