

UNITED STATES NUCLEAR REGULATORY COMMISSION

TENNESSEE VALLEY AUTHORITY

SEQUOYAH NUCLEAR PLANT UNIT 2

DOCKET NO. 50-328

NOTICE OF WITHDRAWAL OF APPLICATION FOR

AMENDMENT TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of the Tennessee Valley Authority (the licensee) to withdraw its July 19, 1995, application for proposed amendment to Facility Operating License No. 79 for the Sequoyah Nuclear Plant Unit 2, located in Soddy Daisy, Tennessee.

The proposed amendment would have revised the technical specification surveillance requirements and bases to incorporate alternate steam generator tube plugging criteria at tube support plate intersections. The approach was similar to guidance given in Generic Letter 95-05, "Voltage-Based Repair Criteria for Westinghouse Steam Generator Tubes Affected by Outside Diameter Stress Corrosion Cracking."

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the FEDERAL REGISTER on August 1, 1995 (60 FR 39189). However, by letter dated September 7, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated July 19, 1995, and the licensee's letter dated September 7, 1995, which withdrew the application for license amendment.

The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee.

Dated at Rockville, Maryland, this 11th day of September 1995.
