Gentlemen:

SUBJECT: REPORT NO. 50-413/84-38

On March 26-30, 1984, NRC inspected activities authorized by NRC Construction Permit No. CPPR-116 for your Catawba facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

This special inspection was a comprehensive examination of your proof and review copy of the Catawba Technical Specifications. The inspection was conducted for the determination of the specifications technical accuracy and content; and for agreement with the actual as-built plant condition. Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representatives records, interviews with personnel, and direct observations by the inspectors.

Within the scope of the inspection, no violations or deviations were identified.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in NRC's Public Document Room unless you notify this office by telephone within 10 days of the date of this letter and submit written application to withhold information contained therein within 30 days of the date of the letter.
