Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-458/92-02 (NON-CITED VIOLATION)

This refers to the inspection conducted by Mr. R. C. Stewart of this office on January 6-10, 1992. The inspection included a review of activities authorized for your River Bend Nuclear Station facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report and pertained to the document control program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector.

It was found that while the failure of a document control satellite station to either void or remove obsolete drawings was in violation of 10 CFR Part 50, Appendix B, Criterion V, the violation is not being cited because the criteria in Appendix C, paragraph V.A. of the NRC's "Rules of Practice," 10 CFR Part 2 were satisfied. This violation was an apparent isolated occurrence and your staff took prompt and effective action to correct the problem.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,
sig signed by
A. Bill Beach
A. Bill Beach, Director
Division of Reactor Projects
