Gentlemen:

SUBJECT: NRC GENERIC LETTER 89-10 INSPECTION AT BROWNS FERRY NUCLEAR PLANT  
DURING THE WEEK OF FEBRUARY 24-28, 1992  
(NRC INSPECTION REPORT NOS. 50-259/, 50-260/, AND 50-296)

This letter is to confirm the above dates for a Nuclear Regulatory Commission inspection at your Browns Ferry Nuclear Plant. The inspection will examine the program you have developed in response to Generic Letter 89-10, "Safety-Related Motor-Operated Valve Testing and Surveillance." The dates were agreed to during telephone conversations between Pedro Salas of your Licensing staff and F. Jape of this office.

As discussed on January 23, 1992, it is our understanding that you will forward us the following information to aid in preparing for the inspection:

1. The procedure or other documents that differential pressure describe your MOV program and the method used for maximum design basis calculations.
2. A list of the valves in the program (if not already included in the program description requested in 1 above).
3. A list of the valves for which you have completed the design basis reviews.
4. A list of the valves that have been diagnostically tested to verify their capabilities in accordance with the program.
