United States Nuclear  
Regulatory Commission - Region IV  
611 Ryan Plaza Drive  
Suite 1000  
Arlington, Texas 76011

Attn: Mr. John Collins  
Regional Administrator

Sub: Reportage of Defects and Noncompliance Pursuant to 10CFR Part 21,  
Paragraph 21.21 "Notification".

Attachment: I. Notification to customers  
(including purchase orders affected)  
II. Code Class N-310

Sir:

On September 22, 1982 at 4:00 o'clock pm the following noncompliance  
was reported to Mr. Hale of USNRC Region IV.

## Noncompliance

Due to a misunderstanding on our part of Code Case N242.1 (upgrading  
of stock material), we elected not to add the provisions of N242.1  
to our ASME Quality Systems Certificate #389 (Supplier) when it  
was offered two (2) years ago by ASME.

Because of this mis-interpretation, we had indeed upgraded some  
stock material outside the scope of NCA-3867.4(e). In lieu of  
testing each piece of material as required, one piece per lot was  
tested. (i.e., all material was under one (1) inch in diameter  
or less)

*J.C. 19  
110*

The material was supplied to the below listed Purchasers who have been notified. (see attachment I)

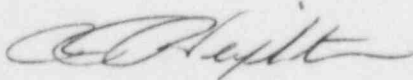

- 1) Stone & Webster - Millstone Nuclear Station Unit #3
- 2) Gulfalloy Inc. - Houston, Texas
- 3) Townsend & Bottum - Enrico Fermi Atomic Power Station
- 4) Gray Tool Company - Houston, Texas
- 5) Peter Kiewit & Sons - WPPSS Unit 3 & 5
- 6) Stone & Webster - Beaver Valley Power Station Unit #2
- 7) United Engineers - Davis Bessie Nuclear Power Station
- 8) Tyler Dawson Co. - Tulsa, Oklahoma
- 9) Alan P. James Co. - Paramount, California

Please consider the usage of Code Case N-310, (Attachment II) which we believe will enable the use of the material.

If you should have questions regarding this matter please do not hesitate to call.

Your continued cooperation is greatly appreciated.

Sincerely,

R. T. Weightman  
Quality Manager
