DCO

Docket No. 50-282
Docket No. 50-306

Northern States Power Company
ATTN: Mr. L. R. Eliason
Vice President, Nuclear
Generation
414 Nicollet Mall
Minneapolis, MN 55401

Dear Mr. Eliason:

Thank you for your letter dated January 29, 1992, in response to our December 30, 1991 letter regarding concerns pertaining to your Fitness-For-Duty program at the Prairie Island Nuclear Generating Plant (AMS R111-91-A-0104).

In our letter, we requested that you review the concerns and inform us of the results of your review including any identified safety-related issues or violations of your Fitness-For-Duty program and submit the results of your investigation to the NRC.

Your response indicated that one concern was substantiated and that another concern was not substantiated. No safety-related issues or violations of your Fitness-For-Duty program were identified. We found your investigation to be sufficient to support your conclusions and have no additional questions regarding this matter. The substantiated concern does not adversely affect the implementation of your license requirements or safe plant operations. We request that you retain the supporting documentation for your investigation of this issue for a minimum of one year from the date of this letter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.
