Dear Mr. Schnell:

SUBJECT: CALLAWAY NUCLEAR PLANT UNIT 1 - INSERVICE INSPECTION (ISI) RELIEF  
"Q" TO THE CALLAWAY PLANT ISI PROGRAM PLAN (TAC NO. M82163)

By letter dated July 19, 1991, you requested relief from certain ASME Section XI requirements for the Reactor Pressure Vessel Supports as described in Relief Request Q for the Callaway Nuclear Plant.

The staff has reviewed your request for relief and is enclosing a copy of the staff's Safety Evaluation. The staff evaluation reveals that the inspection requirements are impractical for the subject system for which relief is being requested and, pursuant to 10 CFR 50.55a(g)(6)(i), that the granting of relief is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. In making this determination, we have given due consideration to the burden that could result if those requirements were imposed on your facility. Therefore, the staff finds your request for relief acceptable and, by this letter, relief is granted pursuant to 10 CFR 50.55a(g)(6)(i).

Sincerely,  
Original signed by Leonard N. Olshan for/

John N. Hannon, Director  
Project Directorate III-3  
Division of Reactor Projects III/IV/V  
Office of Nuclear Reactor Regulation
