Docket Nos. 50-424
50-425

Director, Office of Resource Management
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

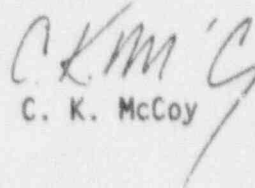

Gentlemen:

**VOGTLE ELECTRIC GENERATING PLANT
MONTHLY OPERATING REPORTS**

Enclosed are the January 1992 monthly operating reports for Vogtle Units 1 and 2. These reports are submitted in accordance with Technical Specification 6.8.1.5.

Also enclosed are revised pages only, which are for the November 1991, and December 1991, monthly operating reports for the Vogtle Electric Generating Plant (VEGP) Unit 1. These reports were previously submitted in accordance with Technical Specification 6.8.1.5 by our letters dated December 11, 1991 (ELV-03289) and January 13, 1992 (ELV-03365) respectively. Each revised entry is denoted by a change bar. These revisions to both the Gross and the Net Electrical Energy Generated were required to correct the erroneous readings taken from a replacement watt meter which had been installed during the Unit 1 refueling outage but not re-set to "zero" after testing.

Sincerely,

C. K. McCoy

CKM/JLL/gmb

Enclosures:

1. Monthly Operating Report - VEGP Unit 1
2. Monthly Operating Report - VEGP Unit 2
3. Challenges to PORV or Safety Valves - VEGP Units 1 and 2
4. Revised Monthly Operating Report for November - VEGP Unit 1
5. Revised Monthly Operating Report for December - VEGP Unit 1
