SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)-UNIT 2
DOCKET NO. 50-446
UNCONTROLLED MATERIAL TRANSFER
SDAR-CP-91-010 (FINAL REPORT)

Gentlemen:

On December 30, 1991, TU Electric notified the NRC via TXX-91475 of a potentially reportable deficiency involving inadequate procedures which resulted in the transfer of material from the CPSES investment recovery warehouse back into the controlled CPSES warehouse. TU Electric has completed the evaluation of this issue and determined that this issue is not reportable.

Records documenting this reportability evaluation are available for review at the CPSES site. Corrective actions required as a result of this issue have been implemented in accordance with site procedures and as discussed in NRC Inspection Report 50-445/91-66;446/91-66.

Sincerely,

William J. Cahill, Jr.
