Docket No. 50-336

Northeast Nuclear Energy Company
ATTN: Mr. W. G. Council, Senior Vice President
Nuclear Engineering and Operations
Post Office Box 270
Hartford, Connecticut 06141-0270

Gentlemen:

By letter dated May 16, 1984, the Division of Licensing (DL) informed your Company of their approval of your application dated October 22, 1982 and issued Amendment No. 95 to Facility Operating License No. DPR-65 for the Millstone Nuclear Power Station Unit No. 2. This application proposed certain Technical Specification changes to (1) allow operation with one inoperable position indicator per control element group, (2) expand the allowable volume band for the safety injection tanks, and (3) revise and modify certain portions of the requirements for containment integrity. A Class III fee (\$4,000) was remitted with your application pursuant to 10 CFR 170.22. Based on a preliminary fee determination for your application, we requested an additional Class II fee (\$1,200) by letter dated November 18, 1982. Your Company remitted the additional fee by letter dated December 6, 1982.

The final review of your application by the DL staff has revealed that both Item 1 and Item 2 involved consideration of a single safety issue. Therefore, a Class III fee (\$4,000) is appropriate for each of these items. The Class II fee (\$1,200) remitted is appropriate for Item 3 since the changes were administrative in nature. It is requested that your Company remit an additional sum of \$4,000 to this office to complete the fees required for your October 22, 1982 application.

Sincerely,

Original Signed by:
Reba M. Diggs
