Joseph M. Farley Nuclear Plant
Technical Specifications Change Request
Elimination of Periodic Pressure Sensor Response Time Testing Requirements

Ladies and Gentlemen:

By letter dated August 17, 1994, Southern Nuclear Operating Company (SNC) proposed changes to the Farley Unit 1 and Unit 2 Technical Specifications to eliminate periodic pressure sensor response time testing requirements. SNC letter dated June 15, 1995 provided supplemental information as requested by NRC letter dated April 17, 1995. SNC letter dated August 11, 1995 transmitted Westinghouse WCAP-13632, Revision 2, "Elimination of Pressure Sensor Response Time Testing Requirements," which included the Foxboro E13DH similarity analysis, priority information clarifications, and the text enhancements discussed in our supplemental response. This letter provides updated Technical Specifications Bases page B3/4 3-2 for Units 1 & 2 to reflect the new WCAP revision.

Respectfully submitted,

Dave Morey
