Dear Mr. Morey:

This refers to the inspection conducted on July 17 through August 20, 1995 at the Farley Nuclear Plant. The purpose of the inspection was to determine whether activities authorized by the licensee were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff listed in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection was to determine whether activities authorized by the licensee were conducted safely and in accordance with NRC requirements.

Within the scope of the inspection, no violations or deviations were identified. However, your attention is directed towards the unresolved item regarding elevated containment air temperature described in the report. This matter will be pursued during a future inspection.
