Dear Mr. Leddick:

Subject: Waterford 3 Technical Specifications

By letter dated April 19, 1984, you were sent the final draft Technical Specifications for your Waterford Steam Electric Station, Unit 3. In that letter, we indicated that there would be some changes required to resolve outstanding issues.

Enclosed are new pages for the Technical Specifications which reflect editorial and typographical changes as well as resolution of issues in the areas of reactor systems, emergency feedwater system operations and ESFAS relay testing. These changes have been discussed with and agreed to by your staff, and thus are being incorporated into the Waterford 3 Technical Specifications. Additional changes may result from resolution of the basemat monitoring issue.

If you have any questions regarding this matter, please contact James H. Wilson, the Project Manager, at (301) 492-7702.

Sincerely,

George W. Knighton
Chief Licensing Branch No. 3
Division of Licensing

Enclosure: As stated
