Inspection Summary

Inspection Between January 13-30, 1992 (Report No. 50-341/92002(DRSS))

Areas Inspected: Routine, unannounced physical security inspection involving Management Effectiveness; Testing and Maintenance; Access Control-Vehicles; Alarm Stations and Communications; Power Supply; and Training and Qualification.

Results: The licensee was found to be in compliance with NRC requirements within the areas examined. Increased emphasis and direction is needed for the security contingency training and drill program. An improvement in maintenance support for security equipment was noted. The Security Compliance Section's audits continued to be a program strength. No errors were noted during observation of security shift operations, and supervision of the security organization was effective.
