

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

February 11, 1992

Docket No.: 50-302

MEMORANDUM FOR: Peggy R. Shaw, Chief  
Administrative Management Branch  
Region II

FROM: Leif J. Norrholm, Chief  
Vendor Inspection Branch  
Division of Reactor Inspection  
and Safeguards  
Office of Nuclear Reactor Regulation

SUBJECT: ACCESS TO RADIOLOGICAL, VITAL, AND PROTECTED AREAS AT  
CRYSTAL RIVER NUCLEAR PLANT

Please forward the following information to Florida Power Corporation in connection with the visit by the persons listed below of this office to the Crystal River Nuclear Plant, Unit 3 on March 23 through March 27, 1992.

This certifies that the persons listed below have attended generic physical security and radiation protection (10 CFR 19.12) training within a one-year period preceding the planned visit dates indicated and are capable of safe conduct in a radiologically restricted area. Accordingly, they should be granted unescorted access to all plant radiological areas, except those requiring respiratory protection, following the site-specific information briefing and security badging.

This also certifies that these persons are employees of the U.S. Nuclear Regulatory Commission. To my knowledge, they do not exhibit adverse character traits or aberrant behavior. Their Q access authorization means that they have been screened to the national level (including a criminal records check); no disqualifying offenses were noted. Trustworthiness was determined by a review of their employment records. On this basis, I recommend that they be granted unescorted access to the vital and protected areas of the facility.

A Q access authorization normally is based on a favorable full-field background investigation conducted by the Office of Personnel Management (OPM), the Federal Bureau of Investigation (FBI), or another U.S. Government

agency that conducts personnel security investigations. A full-field investigation, as a minimum, covers the previous 5 years and includes a credit check, a check of local law enforcement agencies, as well as appropriate educational institution(s), and personnel interviews with the subject, supervisors, co-workers, neighbors, persons given as references, educators, or other personnel, if appropriate. It also includes a check of the records and files of various national agencies, including OPM, FBI fingerprint, criminal, and subversive files, and of other agencies (e.g., Department of Defense, Central Intelligence Agency, and Immigration and Naturalization Service), as appropriate.

An L access authorization for NRC employees is based on a check of records and files of various national agencies, including OPM, FBI fingerprint, criminal and subversive files, and other agencies (e.g., Department of Defense, Central Intelligence Agency, and Immigration and Naturalization Service), as appropriate. In addition, written inquiries are made to persons given as references, as well as to employers, supervisors, educational institutions, and to the local law enforcement agencies in those areas in which the individual has resided or worked within the last 5 years.

The following specific security clearance information is provided.

<u>Name</u>	<u>Badge</u>	<u>Clearance</u>	<u>SSN</u>
Richard P. McIntyre	A-6512	Q	
Stephen D. Alexander	A-6010	C	
Billy P. Rogers	P-7392	L	

Also participating with the inspection team will be Frank Jape and McKenzie Thomas of Region II.
