Dallas, Texas 75201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-445/91-67; 50-446/91-67 (NOTICE OF VIOLATION)

This refers to the inspection conducted by Messrs. D. L. Kelley, R. B. Vickrey and R. M. Latta of this office on December 9-13, 1991, and January 6-9, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

The areas examined during the inspection are identified in the report and included the review of Unit 2 preoperational test procedures and the review of the quality assurance audit of Unit 2 startup activities.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation is of concern because it indicates an inadequate review of preoperational test procedures for Unit 2.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
