SUBJECT: COOPER NUCLEAR STATION - OPERATIONAL SAFEGUARDS RESPONSE  
EVALUATION (TAC NO. M91973)

Dear Mr. Horn:

This letter conveys the results and conclusions of the Operational Safeguards Response Evaluation (OSRE) conducted by the NRC's Office of Nuclear Reactor Regulation at the Cooper Nuclear Station from August 14 through August 17, 1995.

One purpose of the OSRE program is to evaluate a licensee's ability to respond in a contingency to an external threat by focusing on the interactions between operations and security in establishing priorities for protection of equipment and on the defensive strategies used. The OSRE also includes a safety/safeguards interface review to assure that safeguards measures do not adversely affect safe operation of the facility.

The OSRE conclusions are documented in the enclosed report (Part I, Operational Safeguards Readiness Review; and Part II, Safety/Safeguards Interface Review). This enclosure, which contains safeguards information of a type specified in 10 CFR 73.21, will not be placed in the Public Document Room, and must be protected against unauthorized disclosure.

The drills, exercises, and demonstrations observed by the team and the results of interviews conducted by the team indicated that, overall, the security force demonstrated an effective contingency response capability. The team also noted the high quality and extent of operations involvement in the planning and exercising of the contingency response capability. The team also concluded that effective provisions were in place to assure that safeguards measures did not adversely affect the safe operation of the facility.

SG - Violation of protection requirements for SAFEGUARDS INFORMATION subject to CIVIL and CRIMINAL Penalties.

Enclosure contains SAFEGUARDS INFORMATION  
Upon removal of enclosure this document  
is DECONTROLLED.
