RE: THE REGENTS OF THE UNIVERSITY OF CALIFORNIA (UCLA Research Reactor) - Docket No. 50-142 OL (Proposed Renewal of Facility License)

MEMORANDUM AND ORDER

On June 18, 1984, this Board issued a Memorandum and Order reciting its understanding of our oral stipulation among CBG, UCLA, and Staff regarding shipment of fuel offsite by UCLA. Late Thursday, June 21, this Board received copies of correspondence between UCLA and CBG which indicates that agreement cannot be reached between the two. The Board had earlier been advised orally by CBG of difficulties between these two parties. The correspondence indicates that in UCLA's view, offsite shipment cannot be accomplished on CBG's preferred schedule.

Consequently it is hereby ORDERED

1. This Board's June 18, 1984 Memorandum and Order is hereby vacated;
2. All further proceedings in this docket are hereby suspended pending action on UCLA's motion to withdraw its license renewal application;

DS02

3. UCLA is to ship the nuclear fuel presently onsite to a suitable recipient as soon as reasonably practicable consistent with applicable regulations and with its security, public health, and safety obligations; and

4. UCLA is to immediately take all necessary steps to ensure that water cannot be intentionally or accidentally introduced into the reactor core so long as fuel is present in the core.

It is so ORDERED.
