MEMORANDUM FOR: Edward L. Jordan
Director, Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM: *Richard W. Krimm*
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Ohio Schedule of Corrective Actions for Deficiencies
Identified During the Davis Besse Nuclear Power Plant
Offsite Radiological Emergency Preparedness Exercise
Conducted on April 13, 1983

Attached is the schedule of corrective actions submitted by the State of Ohio for the deficiencies noted in the Final Report for the Davis Besse Nuclear Power Plant Offsite Radiological Emergency Preparedness Exercise conducted on April 13, 1984. The exercise report and an addendum to the report were sent to you on May 4, 1984.

The Federal Emergency Management Agency (FEMA) Headquarters and Region V staff have reviewed the schedule of corrective actions submitted by the State and found it to be adequate. Based on the exercise and the corrective actions schedule, we cannot identify any impediments to protecting the health and safety of the public in the event of an incident at the Davis Besse Nuclear Power Plant. Ottawa County will, however, be required to demonstrate a shift change (A.4) and a capability to protect mobility impaired persons (J.10.d) during the next offsite exercise.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 287-0200.

MEMORANDUM FOR: Assistant Associate Director, Office of Natural
and Technological Hazards

Attention: Robert Turner, SL-NT-TH

FROM:

for Dan R. Mint
Wallace J. Weaver, Chairman
Regional Assistance Committee

SUBJECT: Schedule of Corrective Actions for Davis Besse
Exercise Report

FEMA Region V has reviewed the State's schedule of corrections to the Davis Besse Exercise Report for the exercise conducted April 13-14, 1983. This schedule of corrections has adequately addressed the deficiencies in the report. A copy of the schedule of corrections is attached for your information.

J.10.m/M.3

During the April 13/14, 1983 Davis Besse exercise, it became difficult to make protective action recommendations. The NRC participated full scale and was, therefore, making protective action recommendations along with the State and Utility. This created a problem in coordination for three reasons: (1) The State, County, Utility, and NRC had not agreed on participating in a dry run prior to the graded exercise, (2) The necessity to dedicate the person in charge of dose assessment at the State level to act as the Governor's representative for the duration of the exercise, and (3) The dose assessment methods used by the State of Ohio, Department of Health and the NRC were dissimilar.

These actions inhibited existing procedures and resulted in delays in implementing the protective procedures. Ohio will do everything possible to expedite the activation of protective action recommendations, but will insist on closer coordination of activities and methods to be used prior to the next drill.

As in previous statements made by FEMA regarding these two criteria items, emphasis will include coordination with the County and interaction through whatever methods decided upon by the State and County, to facilitate timely decision making and PAG recommendations.
