JUNE F DOOR

MEMORANDUM FOR:

Edward L. Jordan

Division of Emergency Preparedness

and Engineering Response

Office of Inspection and Enforcement U.S. Nuclear Regulatory Commission Richard W. Krimm

FROM:

Assistant Associate Director

Office of Natural and Technological

Hazards Programs

SUBJECT:

Exercise Report of the September 21, 1983, Joint Exercise

of the Offsite Radiological Emergency Preparedness Plans

for the Yarmont Yankee Nuclear Power Plant

Attached are two copies of the Exercise Report of the September 21, 1983, full participation joint exercise of the offsite radiological emergency preparedness plans for the Vermont Yankee Nuclear Power Plant, Vernon, Vermont. The States of Vermont, New Hampshire, Massachusetts, and 17 localities participated in the exercise. The May 11, 1984, report was prepared by Region I of the Federal Emergency Management Agency (FEMA) and reflects the comments resulting from the Regional Assistance Committee review.

FEMA Region I has furnished a copy of this report to the States of Vermont, New Hampshire and Massachusetts and will request a schedule of actions for correction of deficiencies. As soon as we receive and analyze the State's response, we will send you our determination.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 287-0200.

Office of Natural and Technological Hazards al Ylumos

FROM:

Edward A. Thomas, Division Chief

Natural and Technological Hazards

SUBJECT:

Final Report for the September 21, 1983 Joint State and Local Radiological Emergency Response Exercise for the Vermont Yankee Nuclear Power

Station

Three copies of the final report on the September 21, 1983 Joint State and Local Radiological Emergency Response Exercise for the Vermont Yankee Nuclear Power Station are attached. The exercise demonstrated that off-site preparedness continues to be adequate, providing reasonable assurance that appropriate measures can and would be taken to protect the health and safety of the public living in the vicinity of the plant if a radiological emergency occurred.

The report is in compliance with the procedural policy in the August 5, 1983 memorandum with the exception of a chart tracking deficiencies from past exercises which will be furnished as soon as our staff resources permit.
