Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Reference: 10 CFR, Part 21 Notification
Event Number 29257
QAM 95-065

Subject: Interim Report; Supplemental Results

To Whom It May Concern:

This letter provides you notification that B&G Manufacturing Co., Inc.'s Cardinal Industrial Products Division (CIP) has identified an additional defective lot of $\frac{3}{8}$ -16x1 $\frac{1}{2}$ " Hex Capscrews ASTM-A-193 Grade B7 (Lot # 09157, Heat # CK-256, and head markings B7, C, TS1), from which orders were processed and sold to customers by Cardinal Industrial Products, L.P., the entity from which B&G earlier this year purchased certain assets, including the name.

Attachment 1 to this report identifies all of the customers who, based on the records CIP acquired from the prior owner, received these suspect fasteners that could possibly create a safety hazard. All of these customers received these fasteners from the prior owner, and we have notified the prior owner of this situation. The customers will be notified of this defect by CIP as a service to its current customers and will be instructed to evaluate this condition in accordance with 10 CFR Part 21, paragraphs 21.21 (a) (1) (ii) and (b) (1).

CIP is continuing the investigation and will provide a complete report to the NRC as explained in our previous correspondence.

Should you have any questions concerning this issue, please contact me at (702) 739-1966.

Sincerely,

David Z. Hathcock
Quality Assurance Manager
