Mr. J. D. Sieber, Vice President
Nuclear Group
Duquesne Light Company
Post Office Box 4
Shippingport, Pennsylvania 15077-0004

Dear Mr. Sieber:

SUBJECT: RESPONSE TO GENERIC LETTER 91-11: LCOs FOR CLASS 1E VITAL
INSTRUMENT BUSES AND INTERLOCKS AND LCOs FOR CLASS 1E TIE BREAKERS
(TAC NOS. M82377 AND M82378)

On July 18, 1991, the NRC issued Generic Letter 91-11 (GL 91-11) which identified the Commission's resolution of Generic Issues 48 and 49. The GL requested licensees to certify that procedures exist which contain time limitations and surveillance requirements for (1) vital instrument buses (VIBs), (2) inverters, or other onsite power sources for VIBs, and (3) tie breakers that can connect redundant Class 1E buses. If procedures do not exist, a justification was requested documenting the reasons why such controls are not necessary.

Duquesne Light Company (DLC) responded to GL 91-11 by letter dated December 30, 1992. That response indicated that for Beaver Valley Power Station, Units 1 and 2, the recommendations of GL 91-11 have been implemented.

We have reviewed your response and find that it meets the reporting requirements of GL 91-11. This completes our activities with respect to this issue.

Sincerely,

/s/

Albert W. De Agazio, Sr. Project Manager
Project Directorate I-4
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
