Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-285/92-01

This refers to the inspection conducted by Dr. D. B. Spitzberg and Mr. J. Whittemore of this office on January 27-31, 1992. The inspection included a review of activities authorized for your Fort Calhoun Station. At the conclusion of the inspection, the findings were discussed with those members of the plant staff identified in the enclosed report.

Areas examined during the inspection are identified in the report and include a review of the operational status of the emergency preparedness program. The inspection consisted of selective examination of procedures and representative records, interviews with personnel, and evaluation of personnel proficiency in performing emergency response duties.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. However, in accordance with Section V.G.1 of NRC's Enforcement Policy, no violation is being issued for the violation described in paragraph 3 of the enclosed inspection report. No deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's Rules of Practice, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
