

APPENDIX A

NOTICE OF VIOLATION

Philadelphia Electric Company  
Limerick Generating Station, Unit 1

Docket No. 50-352  
License No. CPPR-106

As a result of the inspection conducted between March 28 and April 13, 1984, and in accordance with the NRC Enforcement Policy (10 CFR 2, Appendix C) published in the Federal Register Notice (49 FR 8583) dated March 8, 1984, the following violation was identified:

10 CFR 50, Appendix B, Criterion XI, Test Control, requires that test procedures include provisions for assuring that all prerequisites for a given test have been met.

Colt Industries, Fairbanks Morse Engine Division diesel engine startup procedure requires that cooling water flow be established and verified prior to running the emergency diesel engine.

Contrary to the above, on April 10, 1984, the vendor diesel engine startup procedure was not effectively implemented when the 'C' Emergency Diesel Generator was started without adequately assuring that the prerequisite cooling water flow was established and verified and the engine was run for approximately 11 minutes, including 4 minutes at fully loaded conditions.

This is a Severity Level IV Violation (Supplement II).
