Dr. William F. Hushion
Medical Director
Philadelphia Electric Company
2301 Market Street
Philadelphia, Pennsylvania 19101

Dear Dr. Hushion:

This letter confirms the verbal understanding reached between Pottstown Memorial Medical Center (PMMC) and Philadelphia Electric Company (PECO).

PMMC agrees to respond to PECO requests to provide hospital treatment for victims of radiological accidents, including contaminated individuals from the Limerick Generating Station. PMMC also agrees to maintain its capacity to respond to these incidents, making appropriate personnel available for training and participation in emergency medical drills, and to fulfill its responsibilities delineated in its protocol for handling radiation accidents.

It is the understanding of PMMC that PECO agrees to the following:

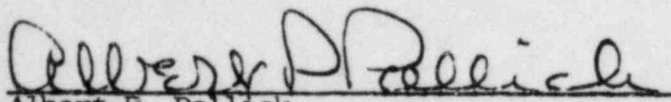

1. To provide for the training and restraining of PMMC personnel in the medical response to radiological accidents.
2. To provide special equipment and supplies necessary for PMMC to maintain its capacity to respond to radiological accidents.
3. To provide procedures for the handling, treatment and decontamination of an injured or ill patient from the Limerick Generating Station.
4. To perform a semi-annual inventory of equipment and facilities.
5. To provide for the removal from PMMC of all contaminated waste resulting from radiological accidents involving PECO personnel or facilities.

6. To provide monitoring for radioactive contamination, and decontamination required as a result of incidents involving individuals from Limerick Generating Station, and to repair or replace equipment and facilities which in PECO judgment are not decontaminable to Nuclear Regulatory Commission standards for unrestricted use, or are damaged by PECO decontamination efforts.
7. To provide a PECO-qualified Radiation Protection Technician at the hospital, for each incident, in the ambulance or at least upon arrival of the ambulance at PMMC.
8. To provide or arrange for ambulance service.
9. To retain a medical consultant to include consultation and laboratory services on a 24-hour standby basis (including dispatch of consultant to PMMC if medically required), and through said consultant to provide access to a definitive care center.
